

# Karabar High School

## Day 1 Term 3 Welcome

Karabar High School upgrade

## Welcome to your school

We're excited your new school facilities are ready for you to use.  
The upgrade to your school includes:

**10** new permanent  
learning spaces

A new seminar space and  
new staff study facilities

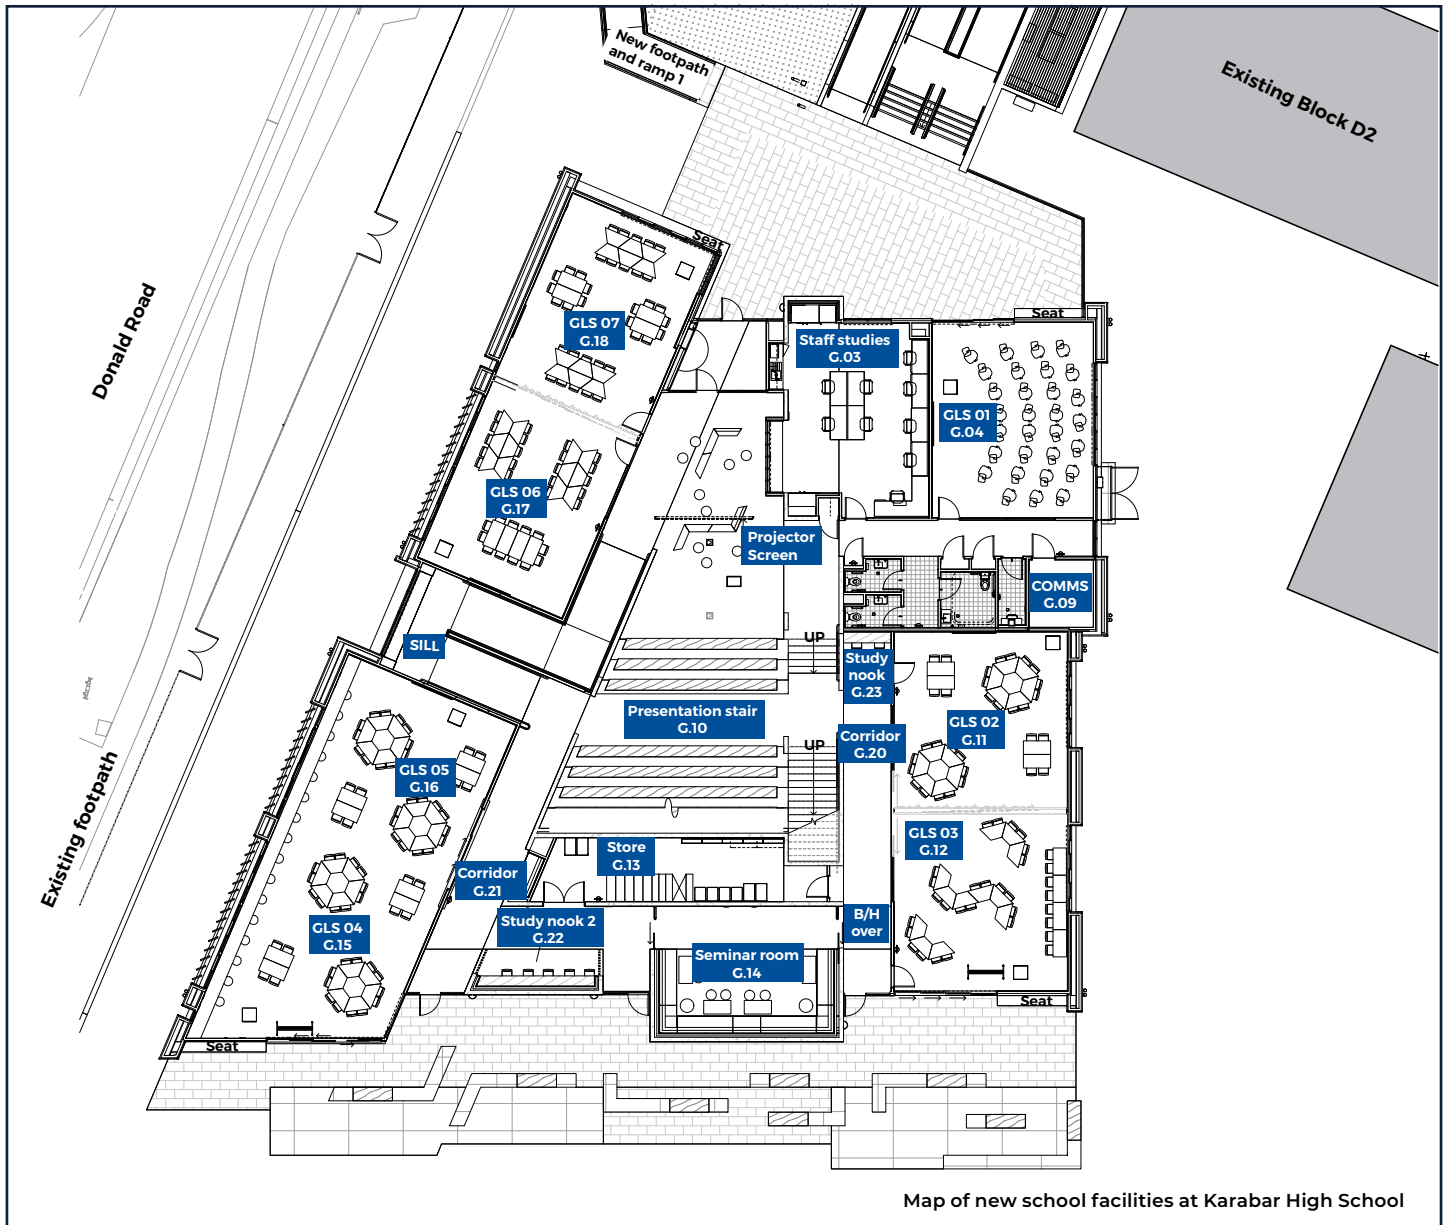

New covered walkways  
and ramps

Landscaping and accessibility  
improvement works

Thank you for your patience during construction, we are thrilled to deliver this project for your school community and hope you enjoy your new spaces.

## Message from your Principal

Karabar High School has a strong focus on preparing students for further study inclusive of University entry. With this in mind the concept for the new building was to replicate a University style of educational delivery designed for use by Stage 6 students as a transition building between secondary schooling and University.

After an extensive consultation stage and numerous discussions at the school executive level it was decided to build a structure which allowed for 'lectures' to take place with the construction of the amphitheatre setting allowing in excess of 200 students to be seated at any one particular time. The breakout spaces from this 'lecture hall' then lend themselves to 'tutorial' formats replicating those held in Universities around the world. This space will also lend itself to being utilised by the community for larger gatherings as existing community facilities are not fit for purpose and it is envisaged that this building will allow for increased community engagement.

In the remaining six breakout spaces there are a combination of classrooms which can be fit for purpose with one double space suitable for up to 60 students, two multi-purpose spaces which are flexible rooms allowing for two more 60 student capacity spaces or four smaller spaces for up to 30 students. The one remaining main space has been designed for up to 30 students with furniture suited to lecture presentation styles allowing for two lectures to take places in the building at any one time.

In addition to this there are a number of smaller breakout spaces which can be utilised for small group or individual private study areas. The technology installed in to the new building is state of the art allowing students to engage in cutting edge educational delivery.

We look forward to welcoming our students and our school community to this next stage of learning at Karabar High School.

**Andrew Turvey M.Ed. Principal**

# Innovative learning environments

---

The upgrade to Karabar High School has now been completed. This exciting project has delivered innovative learning environments for the next generation of young minds.

Innovative learning environments offer flexibility where teachers can provide opportunities for student engagement. The learning spaces:

- are adaptable to accommodate small or large groups
- include learning centres with flexible spaces that allow students to use technology in a variety of settings
- provide opportunities to enhance skills in collaboration, communication, critical thinking, problem solving and creativity.
