

Investing in our schools

A project is underway to upgrade Kingscliff High School to provide new and refurbished learning spaces and core facilities.

The upgrade will provide:

Refurbished learning spaces

New senior learning environment

New visual and performing arts building

New sports pavilion

Refurbished hospitality facilities

Project schedule

The timeline for completion of main works has been extended to cater for additional time needed to achieve planning approvals and meet the conditions of consent. It is anticipated that the upgrade of Kingscliff High School will now be completed by late 2022.

To ensure the school gains the benefits of new facilities as soon as possible, the upgrade will be delivered progressively. In addition to the early works already delivered, further new facilities will be ready for use by the school in late 2021, with the remainder being ready for use throughout 2022.
