

Kingscliff Public Schools

Works notification | August 2023

Dear Parents/Staff/Carers/Community

As part of the ongoing upgrades to Kingscliff Public School, an electrical fault affecting a number of areas within the existing school site was discovered late last Thursday 3 August 2023 and mains power to the site was disconnected.

Mains power has not yet been fully reconnected to Kingscliff Public School, however the school will reopen to students and staff tomorrow, Wednesday 9 August 2023, with two generators powering a number of classrooms.

The generators will operate from 7am to 6pm five days a week with one generator located in the carpark off Orient Street and the other is behind building C, on the school grounds. This arrangement is likely to be in place until the new buildings are completed, in October 2023.

We recognise that this arrangement may generate some additional noise on site and we will work to minimise these impacts where we can.

Further communications will be provided to the community as works to restore mains power to the school progresses.

For further queries please contact School Infrastructure NSW (SINSW) via the contact details below

Thank you for your cooperation during this important work.
