

Artist impression of Kingscliff Public School upgrade

Kingscliff Public School

Project update | 28 June 2023

Project overview

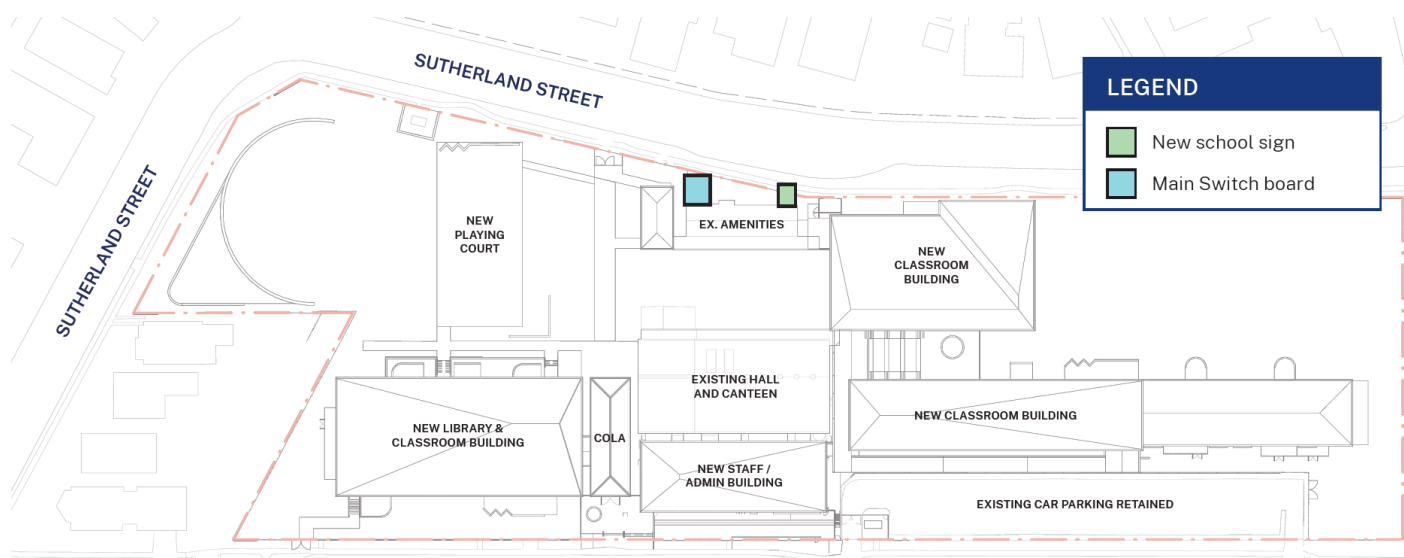

Kingscliff Public School is being upgraded to provide new permanent teaching spaces and core facilities to cater for enrolment growth in the area. The scope of work includes replacement of all classrooms including demountable buildings, a new library and administration building, an extended hall with new canteen, new outdoor spaces, and a redeveloped school entry.

Planning update

The Department of Environment and Planning (DPE) has approved the State Significant Development Modification Application for the remainder of the upgrade at Kingscliff Public School. The changes have arisen where improvements and efficiencies to the original design have been identified.

The Conditions of Approval can be found on the DPE major projects website <https://www.planningportal.nsw.gov.au/major-projects/projects/kingscliff-public-school-mod-1>. School Infrastructure NSW now has the necessary planning consents for the following:

- A new digital School sign on Sutherland Street
- Updating the species of feature trees from Port Jackson Fig to Lemon Scented Myrtle.
- Replacement of Compressed Fibre Cement (CFC) soffit cladding to Buildings 1, 3 and 4 with off-form concrete on ground level walkways
- Reconfiguration of stairs to the outdoor amphitheatre to include 2 sets of stairs and handrails
- Reconfiguration of roof skylights in Building 3
- Main Switch Board enclosure located towards the eastern site boundary.

Map above shows the location of the new school sign and the Main Switch Board.

Next steps

Construction works are continuing on Buildings 3 and 4.

We thank the community for your ongoing understanding and patience while we deliver the Kingscliff High School upgrade.
