Kingscliff Public School

Project update

February 2020

Investing in our schools

The NSW Government is investing \$6.7 billion over four years to deliver more than 190 new and upgraded schools to support communities across NSW. In addition, a record \$1.3 billion is being spent on school maintenance over five years. This is the largest investment in public education infrastructure in the history of NSW.

Project overview

Kingscliff Public School will be upgraded to provide new permanent teaching spaces and core facilities to cater for future enrolment growth in the area. The upgrade will ensure Kingscliff Public School students have access to innovative learning environments that support future focused teaching and learning practices.

The scope of work includes replacement of all classrooms including demountable buildings, a new library, an extended hall, new play spaces and a redeveloped school entry.

Progress summary

Concept designs for the upgrade have been developed in consultation with staff, students and parents. Schematic designs are being prepared and the planning approval pathway is being developed.

A tender has been released for an early works package and a contractor will be engaged by early March. A main works tender package will be prepared once schematic designs have been completed.

Next steps

Early works (Stage 1) are forecast to commence in March 2020 and main works (Stage 2) in June 2020.

Information session

To find out more about the project and view the concept designs you are invited to attend a drop-in information session.

The information session will be held from 7:45 to 8:45am on Thursday 5 March 2020 in the Kingscliff Public School Hall.
