

# Welcome to the Ku-ring-gai High School information session

Today you will be given an opportunity to view the plans for the upgrade, meet the project team, and provide important feedback.

## Questions and feedback

Please let us know if you have any questions or feedback by:

- Speaking with the project team here today
- Writing down any comments or questions and placing them into the feedback box.

# Progress summary

The design is completed for the multipurpose hall.

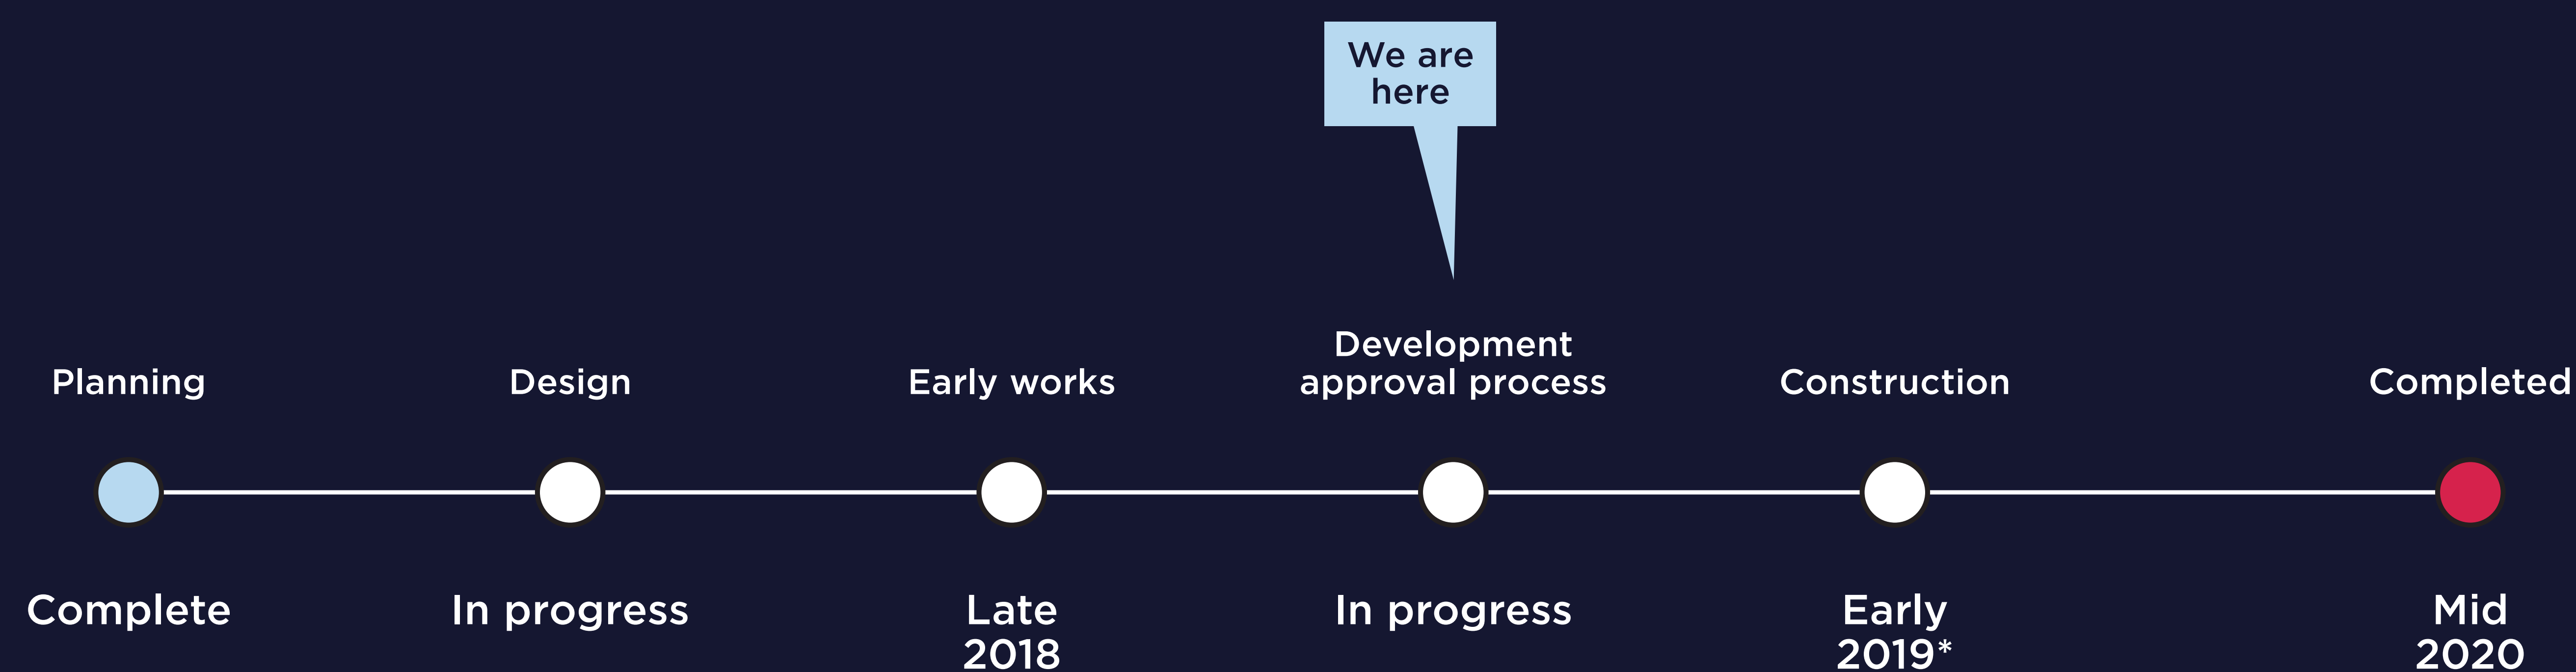

A development application and preparation for the construction tender is underway.

## Next Steps

- Site signage will be installed at site
- A development application will be lodged with the local council
- Early works will start in late 2018.

# Staged Approach

Our commitment to act in the best interest of our school community is at the forefront of our work.

We will work closely with the Principal to minimise any disruptions across the project.

The project is proposed to be completed in multiple stages.

Construction of the new facilities is due to start in early 2019 and is expected to be completed by mid 2020.

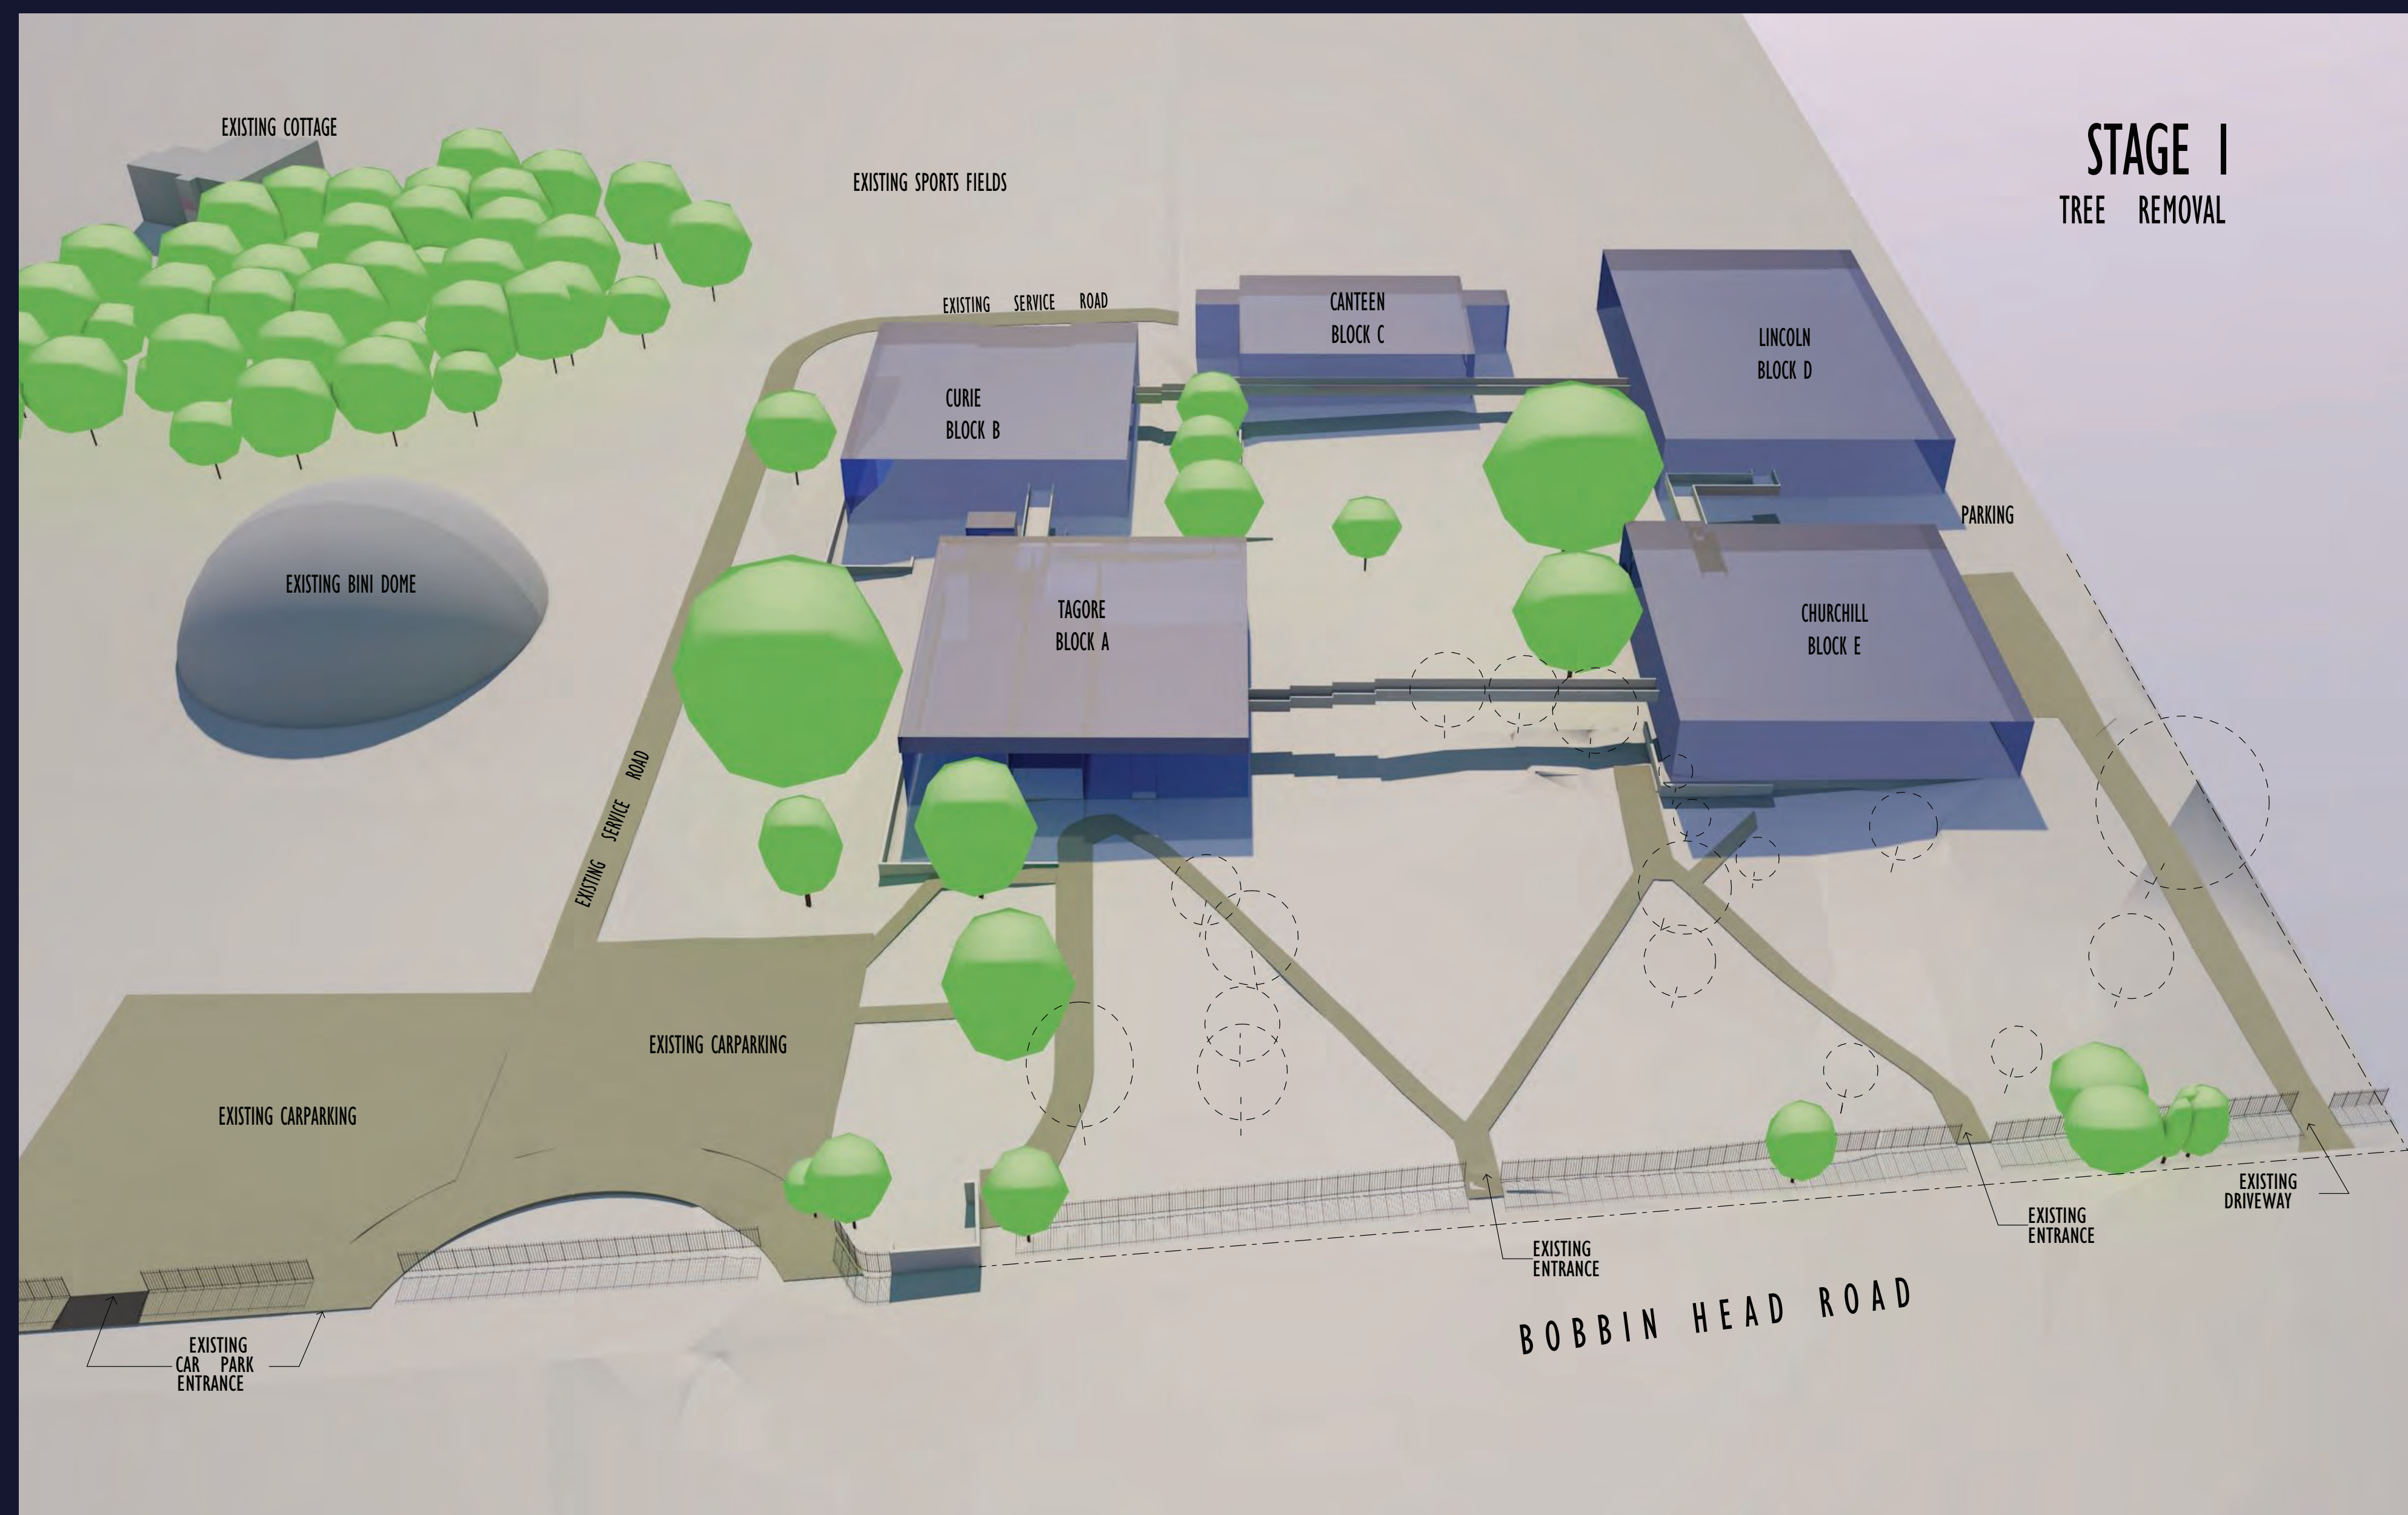

Staging plans for Ku-ring-gai High School hall. Artist render.

# Site management

The upgrade will provide new buildings to accommodate the needs of the school and enable the removal of the existing demountable buildings. During construction, the contractors will follow rigorous processes to ensure the safety of students, staff, contractors, parents and other visitors to the site is maintained.

- The site will be separated from the school grounds by security fences and hoardings
- Contractors enter the site via dedicated entryways
- Measures will be put in place to ensure access around school grounds is managed
- Contractors will be required to minimise traffic impacts for parents and carers, staff and teachers
- Contractor deliveries will be scheduled to minimise impacts to peak times.

# Informed local community

As plans progress for the upgrade at Ku-ring-gai High School, we will keep the local school community and residents informed through a variety of channels. This will include community flyers, school social media, newsletters, website updates and traditional media.

As part of the planning process, plans will be on exhibition for community feed back.

## Future communications

We are committed to working together with our school communities and other stakeholders to deliver the best possible learning facilities for students.

Information booths will be held in future regarding progress and updates on the upgrade. Upcoming information booths will be advertised in the North Shore Times.

Your feedback on this exciting project is important to us. For more information, questions or to make a comment contact us at:
