

An example of an adaptable learning space we are building for students across NSW.

Kyeemagh Infants School Project update

November 2018

Investing in our schools

The NSW Government is investing \$6 billion over four years to deliver more than 170 new and upgraded schools. This includes an additional \$160 million in 2018/19 as part of the record \$747 million maintenance funding announced last year. This is the biggest investment in public school infrastructure in the history of NSW.

Kyeemagh Infants School reclassification

The reclassification of Kyeemagh Infants School has been finalised. Following extensive consultation with the school and broader community, the NSW Government is pleased to announce that the Kyeemagh Infants School will be reclassified to Kyeemagh Public School, catering for students from Kindergarten to Year 6 by 2022.

To ensure a seamless transition, students currently enrolled in Year 2 at Kyeemagh Infants School will continue to Year 3 at Kyeemagh Public School in 2019.

Kyeemagh Public School upgrade

To facilitate this reclassification, the school will receive an upgrade to accommodate up to 500 students across K-6 by 2022.

Next steps for the upgrade include the development of concept designs, followed by the lodgement of an Environmental Impact Statement (EIS) with the Department of Planning and Environment (DPE) as part of the State Significant Development Application (SSDA) process. During this process, DPE will invite formal submissions from the community.

Minor early works will commence on site in early January 2019, which will include site preparation and landscaping. These do not form part of the formal SSDA process.

Pending planning approval, main construction works are scheduled for completion in late 2021.

Keeping you updated

Throughout the planning process and once in construction we will continue to keep you updated and provide opportunities for you to get involved.

There will be info booths held at the school regularly with the project team available, and we will make regular updates on our School Infrastructure website. You can also speak with us via the contact information provided.
