

Artist impression of the new hall. Indicative only

# Lane Cove Public School

Project update | February 2024

## Project Overview

A project is underway to replace the school hall and canteen facilities at Lane Cove Public School which were destroyed in a fire in 2020. The project has already delivered a new school canteen and restored the adjacent playground area. A new school hall with an attached covered outdoor learning area (COLA) is now under construction.

## Progress summary

The building contractor has undertaken site investigations, and we are continuing to work with them to develop a detailed program of works, complete the required administrative tasks and source the sub-contractors required to begin construction. We are close to completing these elements and expect to begin works on site at the end of March 2024. More information will be provided once an exact date of starting construction is available.

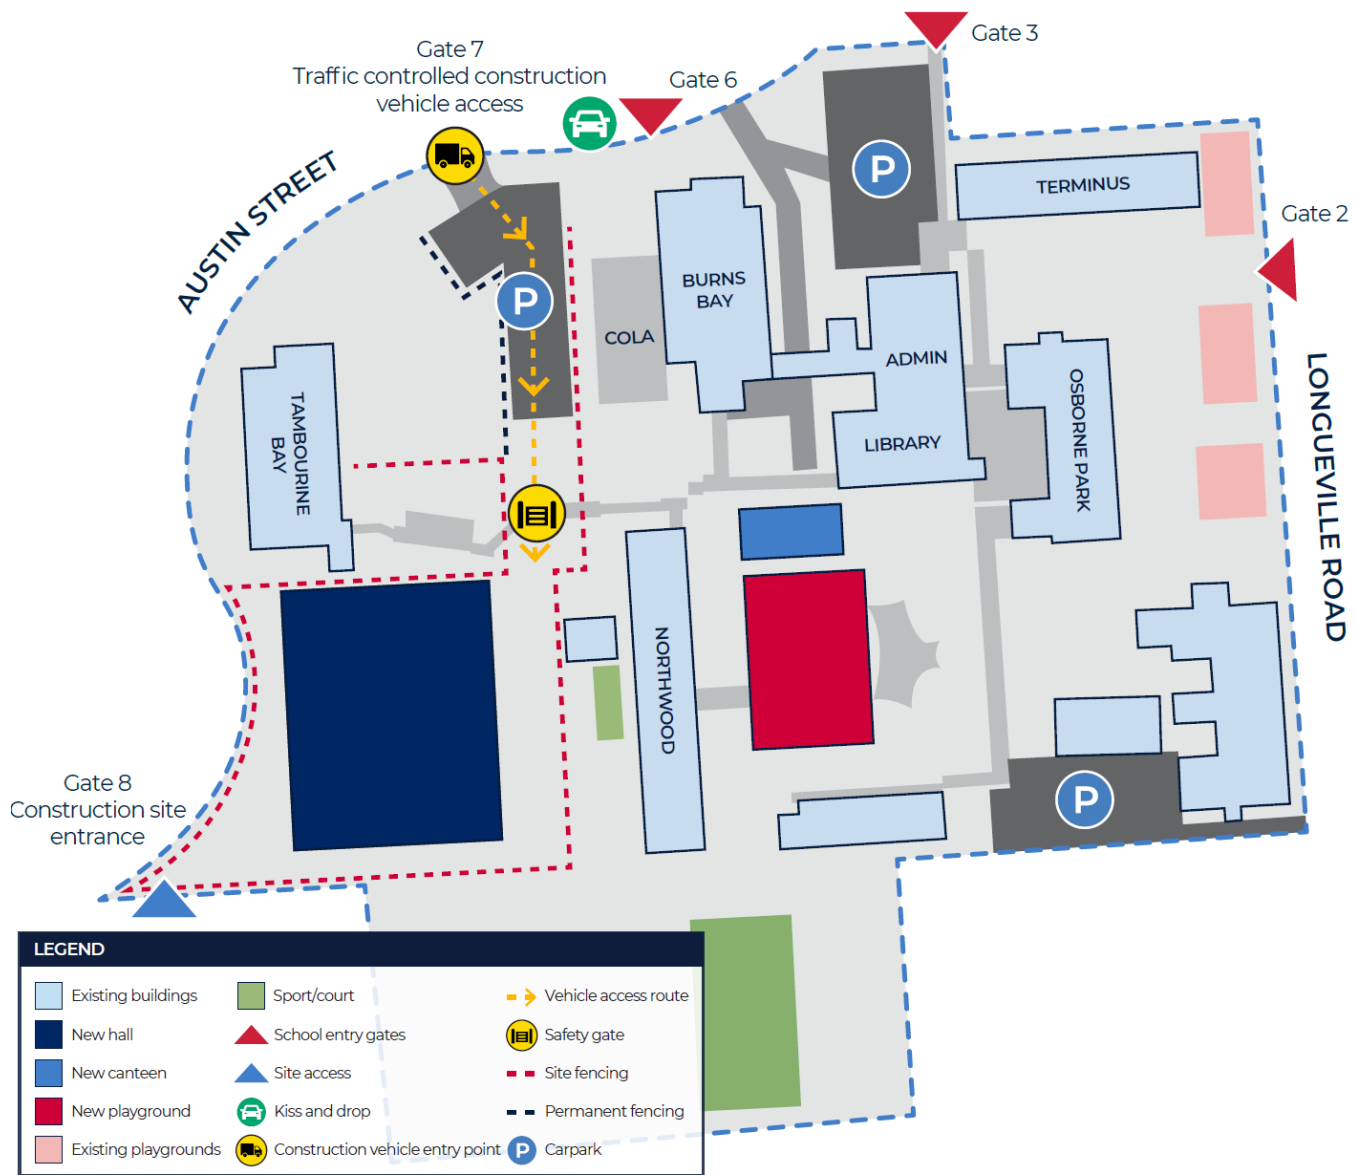

## Next steps

The building contractor is expected to begin works on site at the end of March 2024. The works include:

- complete the roof installation of the new hall.
- install the remaining windows and doors
- prepare and pour the concrete of the covered walkways
- complete the works to install the fire hydrant booster
- install the external façade of the building
- begin internal fit out works.

The entrance to the construction site will remain unchanged, and we are working with the school leadership team to minimise any impact to the school operations as we work to deliver this important project. Please see the map and frequently asked questions on the page overleaf.

### Site plan

## Frequently asked questions

### When will construction be finished?

The project is expected to be finished in mid 2024, dependent on site and weather conditions.

### What will the construction hours be?

When construction begins, working hours will be between 7 am to 5 pm Monday to Friday, and on Saturdays from 8 am and 4 pm. There will be no construction on Sundays or Public Holidays, unless otherwise notified.

### Will there be any changes to the kiss and drop zone?

There will be no changes to the kiss and drop zone which is located on Austin Street at the front of the school.

### What entrances will students use?

Students will be able to enter the school grounds via Gates 2, 3 and 6. During construction Gate 8 will only be accessible for personnel working at the construction site.

### Is the school car park operational?

The school car park accessed via Gate 7 will not be operational during construction. It will be used for vehicle access to the construction site and therefore no cars will be able to park in the allocated parking spaces.

### Where will staff parking facilities be located?

We have secured usage of car spaces at the Lane Cove Council car park across the road from Lane Cove Public School. School staff will be able to use these spaces for the duration of construction period at no cost to the individual. No other car parks within the school will be impacted during construction and will continue to be used by staff.

### How will vehicles access the construction site?

Vehicles will enter the construction site via Gate 7 located on Austin Street and use the existing internal road of the school car park. Safety gates have been installed at the walkway that connects the Tambourine Bay building to the main school. Traffic control personnel will be present when required to safely direct pedestrians and vehicles to and from the construction site including opening and closing of safety gates.

Truck movements will be scheduled to outside school drop-off and pick-up times, where possible, to minimise disruption to students and staff.

Traffic management will be in place where required for the safety of students, staff, the local community and workers. Vehicles will give way to pedestrians at all times.

## Keep in touch

All updates to the project will be shared on the school page for Lane Cove Public School in the School infrastructure website. The page can be accessed in the link [edu.nsw.link/LaneCovePS](https://edu.nsw.link/LaneCovePS) or in the QR code below. We thank the community for your patience as we deliver this important piece of infrastructure.
