

Artist impression of the new hall. Indicative only

Lane Cove Public School

Project update | September 2023

Project Overview

A project is underway to replace the school hall and canteen facilities at Lane Cove Public School which were destroyed in a fire in 2020. The project has already delivered a new school canteen and restored the adjacent playground area. A new school hall with an attached covered outdoor learning area (COLA) is now under construction.

Progress summary and next steps

A construction contract has been awarded to Stephen Edwards Constructions to complete the remaining construction at Lane Cove Public School. With the contractor on board, a detailed works program will be finalised shortly, with re-establishment of the site to prepare for construction happening in the coming weeks. More information about any impacts from the works restarting will be shared with the community once this is available.

Estimated completion update

We are expecting to complete the remaining works of the upgrade in mid 2024, subject to weather conditions. An exact date for completion and handover will be shared with the community once more information becomes available.

Keep updated

All updates to the project will be shared on the school page for Lane Cove Public School in the School infrastructure website. The page can be accessed in the link edu.nsw.link/LaneCovePS or in the QR code below.

We thank the community for your patience as we deliver this important piece of infrastructure.
