Investing in our schools

As part of the NSW Government's plan to rebuild public education, the 2024-25 Budget is delivering record education funding, including \$8.9 billion for new and upgraded schools. This targeted investment will ensure growing communities get access to a world class public education.

Project overview

A project is underway to replace the school hall and canteen facilities at Lane Cove Public School which were destroyed in a fire in 2020. The project has already delivered a new school canteen and restored the adjacent playground area. A new school hall with an attached covered outdoor learning area (COLA) is now under construction.

Progress update

Construction works have continued at Lane Cove Public School with the walls of the new hall formed up and concrete pours underway. Tiling, grouting and window sealing work have taken place as well as preparation for the laying of concrete for the external walkway.

Next steps

In Term 3, we are expecting to finish the concrete retaining walls around the new hall, and finish installing the roof, windows and doors. Once the building is closed in from the weather, we will begin installing internal walls and ceilings, flooring, joinery and fittings like toilets and basins, as well as connecting services like plumbing, electricity, and internet services.

Shade sail installation update

The design and procurement to install a shade sail to provide cover to the school's new astro turf is currently underway. This process has taken longer than anticipated to ensure minimal impact to the delivery timeline of the new hall and alignment with the building contractors construction programme.
