

# Leppington Public School

## Project update | 19 June 2024

### Investing in our schools

As part of the NSW Government's plan to rebuild public education, the 2024-25 Budget is delivering record education funding, including \$3.6 billion for new and upgraded schools in Western Sydney. This targeted investment will ensure growing communities get access to a world class public education.

The upgrade for Leppington Public School is in progress and will include new fit-for-purpose learning spaces and improved core facilities to support the growing student population in the area.

The upgrades will be delivered in two stages. Stage 1 is forecast to open by 2026 and will include:

- 20 new permanent classrooms
- 3 new support learning classrooms
- a new hall and covered outdoor learning area (COLA), and
- upgrade and refurbishment of administration facilities and library

In addition to Stage 1, the 2024-25 Budget has committed funding to progress with Stage 2 of the project which will add additional school capacity for this growing community.

Further detail on the scope and timing of Stage 2 will be determined as the project progresses.

### Progress summary

We have now started the statutory planning process for Stage 1 for Leppington Public School upgrade which will tell us what specialist environmental, and consultant reports we will need to prepare to inform the planning application for the project. These reports will be available for community review once the application for planning approval is placed on public exhibition.

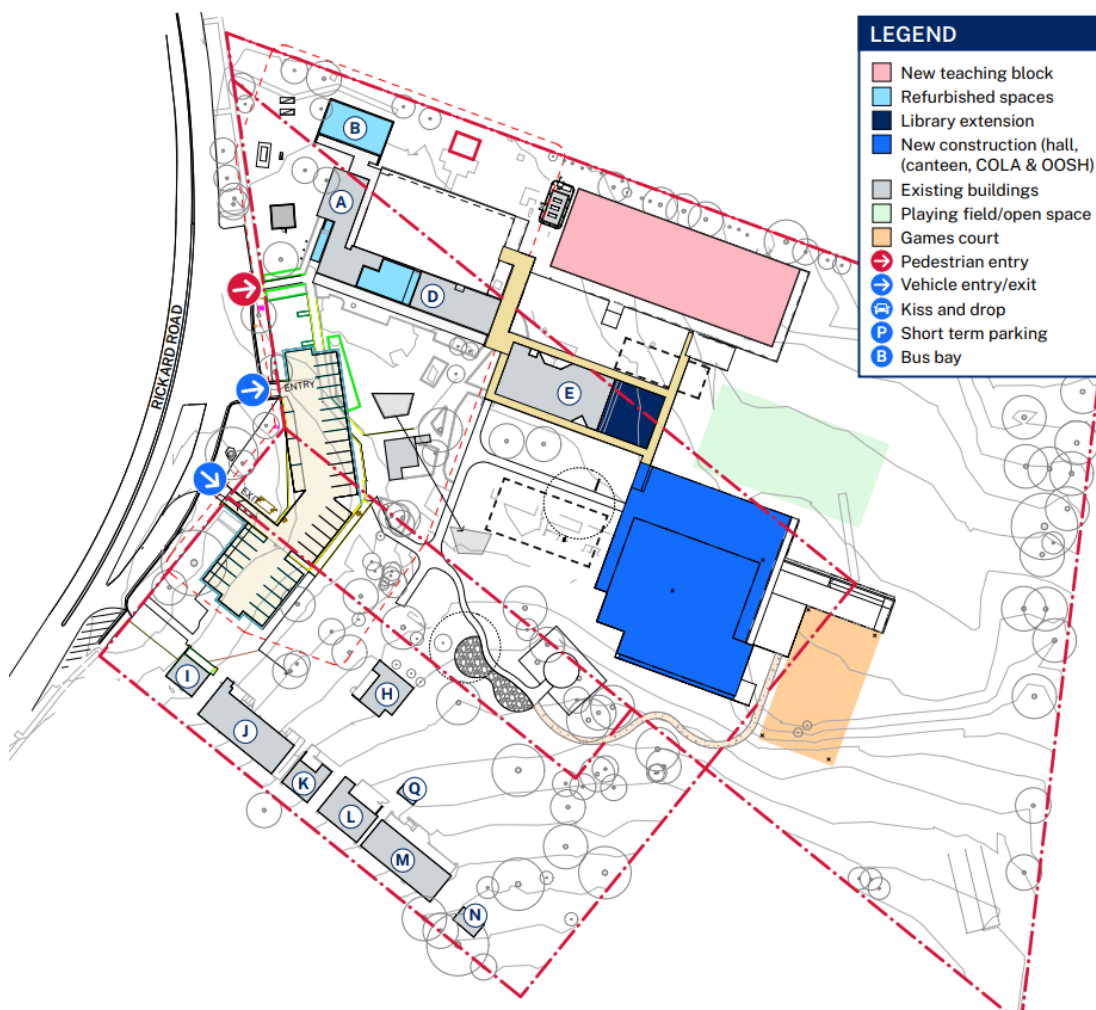

## Next steps

Continuing with the detailed design for the upgrades. There may be some changes from schematic design to detailed design to allow for construction requirements and statutory approvals.

Tender processes to finalise the appointment of a contractor. When the contractor has been appointed we will establish the timeline for delivery of the upgrades for the school and share this with the community.
