

Project overview

We are upgrading Leppington Public School to support the growing population of South West Sydney.

The upgrade will include new fit-for-purpose learning spaces and upgraded core facilities.

The project will deliver:

additional fit-for-purpose permanent classrooms

upgrade and refurbishment of administration facilities and library

new support learning classrooms

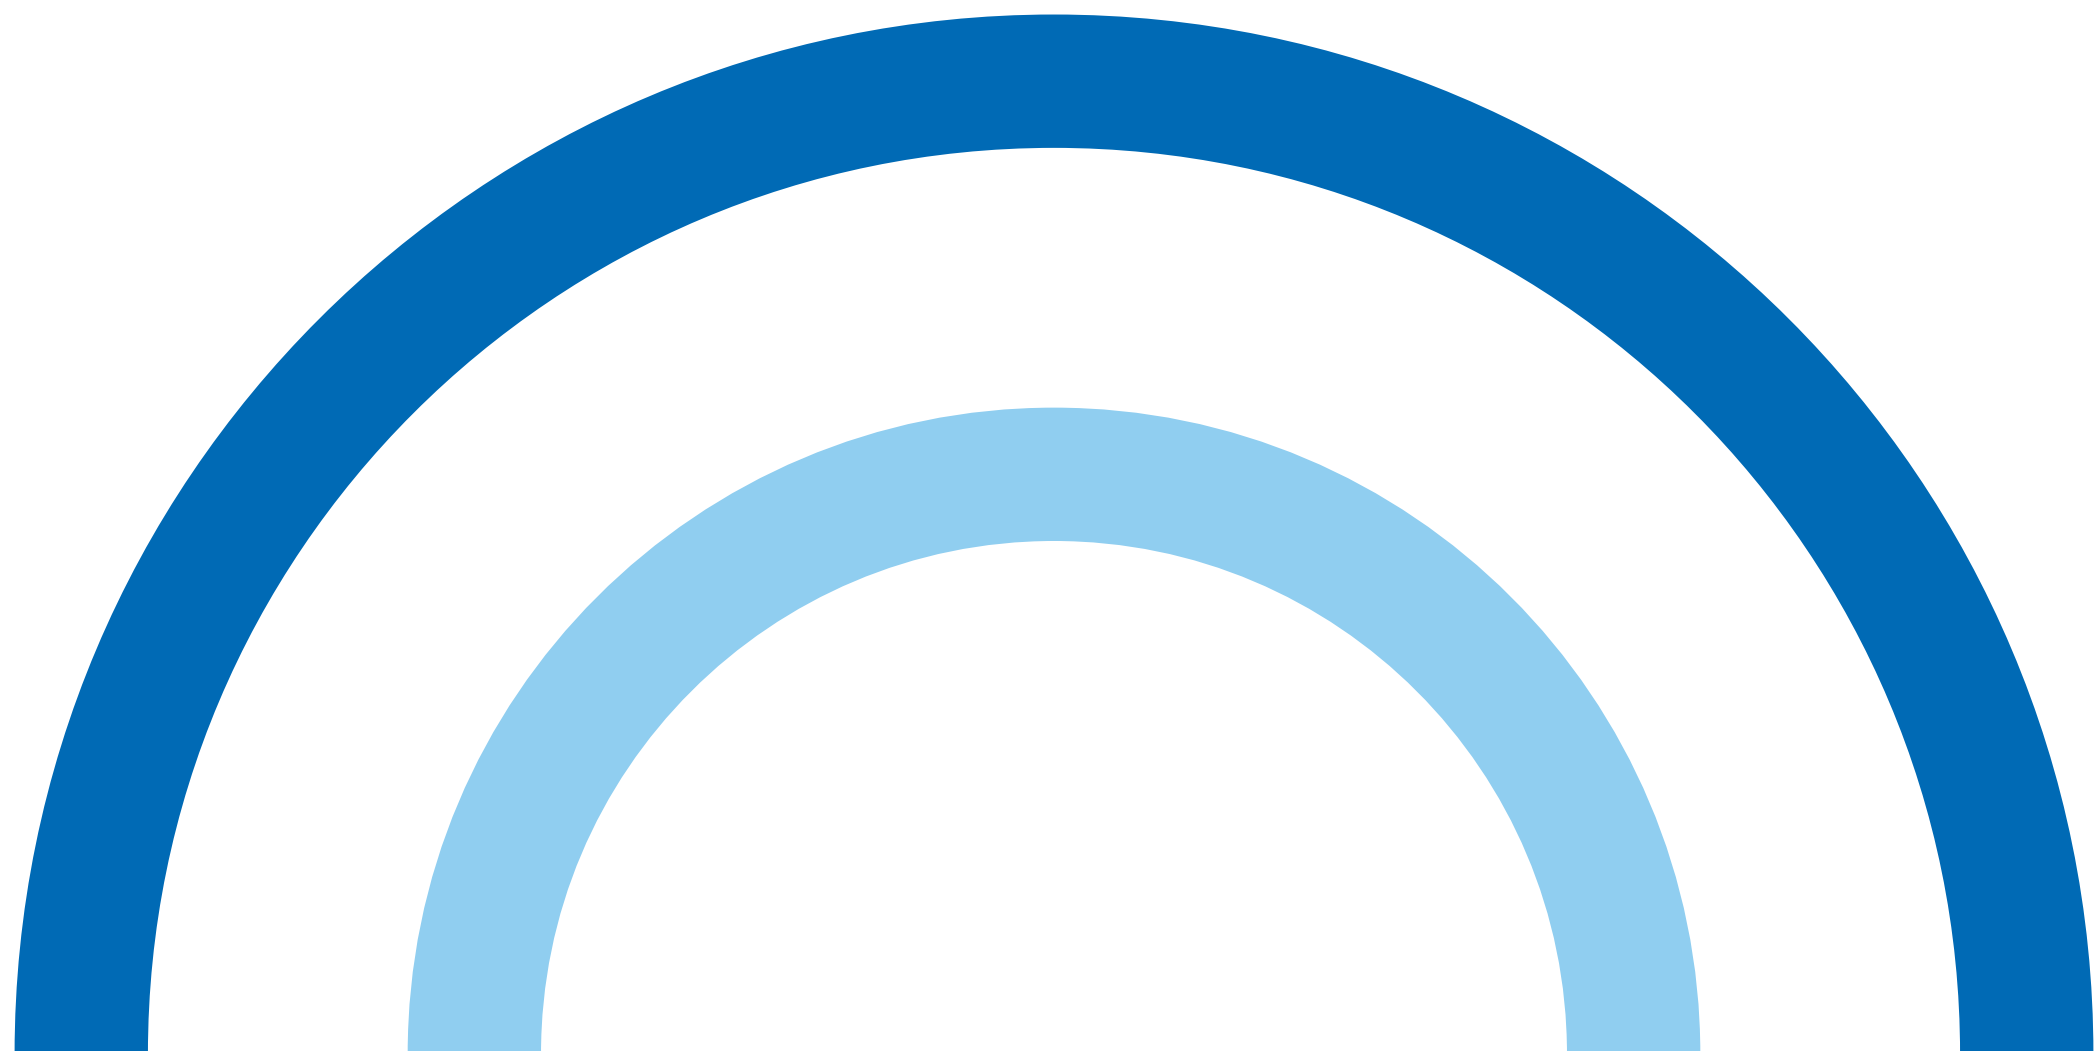

a new hall, canteen and covered outdoor learning area (COLA)

An example of upgrades we are delivering across NSW

Schematic design

We have now progressed the concept design of the Leppington Public School upgrade to the schematic design stage, the third of four design stages. Schematic design involves addressing space, scale and constructability. The proposed schematic design for the upgrades is shown on the map below. The design will evolve as the project progresses and is subject to change.

What’s next?

Finalisation of the schematic design for the new facilities. As the design evolves into more detail, there may be some differences compared to what has previously been shared.

Once the schematic design is finalised, we will submit a Development Application (DA) to Council. The application will be exhibited for submissions and the determination of DA can take up to 12 months.

The tender process to appoint a contractor to the project will begin in mid-2024. Once the Development Application and contractor appointment is finalised, an indicative timeline for the project will be available.
