

Lindfield Learning Village

Works notification

April 2021

A project is underway to deliver Stage 2 of Lindfield Learning Village. This stage will provide additional learning spaces, specialist technical learning spaces and a senior home base focusing on specialised expertise and wellbeing support to transition students between school and their first post-school destinations.

Electrical Upgrade construction works

In order to provide power to Stage 2 of Lindfield Learning Village, a new substation will be installed on school land adjacent to Dunstan Grove. To link in to the Ausgrid network, power cables will be required to be installed in the westbound lane of Dunstan Grove.

The work to connect the substation to the Ausgrid network will start Monday 3 May 2021, and take approximately four days to complete, weather and site conditions permitting.

The work will be undertaken between 7:00am and 6:00pm Monday to Friday and will involve:

- Locating underground services
- Saw cutting road pavement
- Excavating a trench
- Installing conduits
- Connecting new substation to Ausgrid network
- Backfilling the trench and temporary restoration of road surface.

During this time, you may experience minor construction noise, some impact to traffic and mobile plant operating in the area. All efforts will be made to keep disruptions to a minimum.

It is expected that a scheduled power outage will occur as part of this work. At this stage, we do not know the exact dates and times, however your electricity distributor, Ausgrid, will notify impacted residents closer to the date of outage.

Traffic

The work will require the closure of the westbound lane of Dunstan Grove near the work site. Traffic controllers will be in place to manage traffic flow.

At the end of each day, the trench will be backfilled or covered with steel road plates to allow full road access outside of construction hours.

Thank you for your patience while we deliver this important school infrastructure.
