# Liverpool West Public School Upgrade

## Project update

22 June 2021

### Investing in our schools

The NSW Government is investing \$7 billion over the next four years, continuing its program to deliver more than 200 new and upgraded schools to support communities across NSW. This is the largest investment in public education infrastructure in the history of NSW.

The NSW Department of Education is committed to delivering new and upgraded schools for communities across NSW. The delivery of these important projects is essential to the future learning needs of our students and supports growth in the local economy.

### Project overview

School Infrastructure NSW (SINSW) is planning to upgrade the facilities at Liverpool West Public School. The scope includes;

- 10 additional classrooms, and associated administration, canteen and OSHC facilities
- Expanded school hall and covered outdoor learning area (COLA)
- Refurbishment of Building K to enable extension of existing preschool
- Car park reconfiguration.

### Progress Summary

ADCO Constructions has been appointed as the contractor to undertake the initial phase of works on the project. They will set up site establishment in coming weeks. This will include erecting site fences and works to the school carpark.

SINSW is progressing a number of planning approvals processes.

### Next Steps

The first phase of this project includes infrastructure upgrade works and is being carried out under the following planning legislation, *State Environmental Planning Policy (Educational Establishments and Child Care Facilities) 2017* (Education SEPP) and *State Environmental Planning Policy (Infrastructure) 2007* (Infrastructure SEPP).

These works are classified as 'Development without Consent' under the Education SEPP and Infrastructure SEPP. This means that SINSW itself can approve the proposed works subject to a detailed assessment of any potential impacts and consultation with Council, land owners and other relevant stakeholders. Accordingly, a Review of Environmental Factors (REF) is being prepared in accordance with the provisions of the *Environmental Planning and Assessment Act 1979* and the *Environmental Planning and Assessment Regulation 2000*. The REF documents the assessment and any mitigation measures required.

The scope of the infrastructure upgrade works, planned for later this year, includes:

- Refurbishment of Building K to enable extension of existing preschool
- Infrastructure upgrades and service connections (electrical, water, sewer, stormwater, new substation, and communications infrastructure)
- Road Widening works to Flowerdale Road
- Relocate existing street lighting and associated electricity infrastructure works
- Tree removal to facilitate the items above.

ADCO Constructions will start site establishment at Liverpool West Public School during the June/July school holidays, to minimise disruption to the school.

### How to give feedback or ask questions

For more information or to provide comments, please contact [schoolinfrastructure@det.nsw.edu.au](mailto:schoolinfrastructure@det.nsw.edu.au) and reference 'Liverpool West Public School', phone ph. 1300 482 651, or use the QR code.

For your comments to be considered as part of the REF, they need to be received by SINSW by 13 July 2021. General comments or questions on the project can be received at any time.

## Frequently asked questions

### When will the work take place?

The initial phase of work will start in the June/July school holidays, with the main works occurring across 2022. The upgraded facility is expected to be ready for Term 1, 2023.

### Will there be a Development Application (DA) for this project?

The infrastructure upgrade works include road widening, electricity transmission, flood mitigation works, gas supply, sewerage, stormwater, telecommunications and water supply (which are able to be undertaken under clauses of the *Infrastructure SEPP*).

These clauses enable this infrastructure scope to be carried out without consent.

In addition, a Complying Development Certificate (CDC) will be submitted for all remaining works that form part of the larger project including construction of a new building.
