

New Marsden High School Facilities

Flexible Learning Spaces

The new school facilities incorporate flexible learning spaces with moveable furniture and adaptable room configurations. Each learning space is equipped with whiteboards and pinboards on walls and doors.

The learning spaces are technology-enabled with large, interactive screens to serve multiple and interactive learning contexts, providing better opportunities for collaboration and personalised learning.

Recreational spaces

The new school facilities offer a variety of outdoor areas, including covered and open air spaces. Students will have access to covered outdoor learning spaces on each floor, an undercover multi-sport court, and a gymnasium that provides the flexibility of a complete indoor space.

The Gymnasium

The Gymnasium is a state of the art facility that supports multifaceted use from multiple disciplinary sporting capabilities with retractable electronic score boards, triple height ceilings, capacity for

school assemblies and all school events, and a full stage including production equipment such as performance lighting, stage curtains and PA system.

Spaces for collaboration

Community and connection are core values of Marsden High School. The new school facilities will provide opportunities to gather the school community in the school hall, and the new outdoor and undercover spaces.

The new location also provides opportunities to work alongside Meadowbank Primary School and build a relationship that supports students as they progress from Kindergarten through to Year 12.

Building layout and uses

Access to Marsden High School is from Rhodes Street, near the corner of Mellor Street. The primary school has a separate entrance located on Rhodes Street.

Marsden High School is located in the upper two floors of the northern wing, and all floors of the southern wing. General learning spaces are located in the northern wing. Technical learning spaces, the Intensive English Centre, and school administration are located in the southern wing, above the school hall/gymnasium which is located on the ground floor.

The school libraries are located in the central spine between the two wings. The lower floor is a dedicated primary school library, and the high school library is located in the upper two levels, with a senior learning space above the library.

An open air staircase is located through the centre of the two wings, allowing outdoor access from all floors. An established garden separates the schools through the middle of the staircase, and provide a green outlook from learning spaces.
