

Melrose Park Public School redevelopment

Planning update | August 2023

Supporting high quality education

The NSW Government is committed to providing infrastructure that supports high quality education for all students in NSW, investing in new and upgraded facilities as well as the ongoing maintenance of schools.

Project overview

The redevelopment of Melrose Park Public School will provide new classrooms and core facilities to meet anticipated enrolment growth in the area. The project is currently in the planning phase and will potentially include:

- new classrooms and support learning classrooms
- new staff administration facilities
- a new library
- a new hall and covered outdoor learning area (COLA).

The final scope of the upgrade will be subject to business case and statutory planning approvals.

What have we done so far?

During the early planning phase we have:

- further analysed demographic trends and the school community needs through a School Climate Survey
- conducted site investigations
- worked with internal architects to develop masterplan options.

What's next?

- Finalising the business case, which will be subject to government approval.
- Ongoing development of the design in consultation with representatives from the Department of Education and Melrose Park Public School.
- We will continue to keep the community updated. Please visit https://www.schoolinfrastructure.nsw.gov.au/projects/m/melrose_park_public_school_redevelopment.html to stay up to date with project progress.

What did the School Climate Survey show?

The purpose of the School Climate Survey is to gather feedback on how the current school is perceived by students, staff and families, and to assess their experience at the school. School Infrastructure NSW thanks the school community for their participation in the School Climate Survey, held in early 2023.

Specifically, the school community feel that the following infrastructure can be improved:

- pick-up and drop-off areas
- accessibility of the school

- the design and spatial arrangements of indoor learning spaces
- outdoor learning spaces and permanent equipment
- the condition, maintenance and upkeep of the buildings.

We will use the full results and findings of the School Climate Survey as we continue to plan the project and design.

Melrose Park Public School redevelopment

Planning funding has been allocated for the redevelopment of Melrose Park Public School. The information below takes you through the journey of upgrading or building a new school.
