

# Mona Vale Public School

## Works notification

**6 August 2021**

Dear parents/carers,

During construction at Mona Vale Public School, bonded asbestos containing material was found within the construction site underneath Block G. This area is not accessible by students or staff. Bonded asbestos means it is attached to other material such as cement or vinyl and cannot be crumbled by light pressure.

The material will be removed on Saturday 7 August 2021 and the area remediated in accordance with the Department of Education's Asbestos Management Plan and SafeWork NSW regulations. All work will be completed by licensed and accredited asbestos contractors, and monitored by occupational hygienists in strict accordance with all applicable legislation, regulations, policies and guidelines.

Testing will be completed to ensure the area has been fully remediated with a clearance certificate issued at completion of remediation.

Please be assured that the removal of this material will not pose a risk to the local community. The health, safety, and well-being of the school and the local community is our highest priority and we will continue to keep the community updated.

Thank you for your cooperation during this important work.
