# Mosman High School upgrade

## Project update

November 2022

The NSW Government is investing \$8.6 billion in school infrastructure over the next four years, continuing its program to deliver 160 new and upgraded schools to support communities across NSW. This builds on the more than \$9.1 billion invested in projects delivered since 2017, a program of \$17.7 billion in public education infrastructure.

The NSW Department of Education is committed to delivering new and upgraded schools for communities across NSW. The delivery of these important projects is essential to the future learning needs of our students and supports growth in the local economy.

### Project overview

Mosman High School is being upgraded to deliver students the latest educational facilities for teaching and learning. The upgrade project is delivering 16 additional flexible learning spaces, and a new library, multipurpose gym/hall, canteen and administration/staff facilities. The project also includes new outdoor and rooftop play spaces.

### Progress summary

In new Building G, the third and fourth floor slabs have been poured for the main teaching areas. The steel framework for the walls of these floors has also been put up. In-ground services such as water, electricity and information technology have been installed across the works zone.

### Next steps

With main works construction progressing well, the third and fourth floor concrete slabs of the new hall and library will soon be poured and the steel framework for their walls put up. When this work is complete, external framing, cladding works and the support structure for the roof will be installed. Following these works, landscaping and line markings for the school's new rooftop multi-court will start.

In existing Building E new external access stairs will be installed.

In the courtyard landscape improvement works will start after an existing structure is demolished.

*See map overleaf for the location of these works.*
