

Mosman High School upgrade

Update | 6 March 2023

Mosman High School has been upgraded to bring students the latest educational facilities. Most recently, work finished on upgrading the staff car park and installing a new pedestrian crossing on Gladstone Avenue.

New kiss and drop zone – Gladstone Avenue

In February 2024, construction work finished on installing a new pedestrian crossing on Gladstone Avenue. This crossing was a condition of consent of the Mosman High School project proceeding. Mosman Council approved the location of the crossing in August 2023.

As a result of the new crossing, there is a new kiss and drop zone for the school community on Gladstone Avenue opposite Keston Avenue (see map below). The new kiss and drop zone can accommodate 4 cars at any one time.

The pedestrian crossing is improving safety for Mosman High School Students and the local community, including road users, which is our highest priority.
