Mosman High School upgrade

Project update

August 2022

Investing in our schools

The NSW Government is investing \$8.6 billion in school infrastructure over the next four years, continuing its program to deliver 160 new and upgraded schools to support communities across NSW. This builds on the more than \$9.1 billion invested in projects delivered since 2017, a program of \$17.7 billion in public education infrastructure.

The NSW Department of Education is committed to delivering new and upgraded schools for communities across NSW. The delivery of these important projects is essential to the future learning needs of our students and supports growth in the local economy.

Project overview

Mosman High School is being upgraded to deliver students the latest educational facilities for teaching and learning. The upgrade project is delivering 16 additional flexible learning spaces, and a new library, multipurpose gym/hall, canteen, and administration/staff facilities. The project also includes new outdoor and rooftop play spaces.

Progress summary

Main works construction has started on new Building G. The concrete pours for the footings and ground floor slabs are complete and the works to put up the steel framework for the ground and first-floor walls have started. Telecommunications, water and electricity services will continue to be installed across the works zone.

Next steps

In Building G, the first and second-floor slabs will soon be poured. Once complete, the steel framework for the walls of the upper levels will be put up. The next step will build the new brick façade and establish the multi-purpose roof play space.

In Building E, external access stairs will be installed following these works.

Works will then start on the courtyard and an existing structure will be demolished to make way for landscape improvement works.

See map overleaf for the location of these works.
