

Mosman High School

Works notification

19 March 2022

Dear residents, parents and carers,

As part of the upgrade of Mosman High School, works to remove asbestos containing materials within excavated soil stockpiles will continue in the work zone. These works were recently paused due to heavy rain and have now resumed.

Safety measures and monitoring are in place to ensure there is no risk to students, staff or the local community. This includes A-class hoardings around the construction site, dust suppression measures and all on-site staff completing the removal works wearing protective clothing such as coveralls, gloves and footwear.

Works to remove the asbestos containing materials will continue until Thursday 14 April 2022, in accordance with the Department of Education's Asbestos Management Plan and SafeWork NSW regulations.

All work will be completed by licensed and accredited asbestos contractors, and monitored by an independent occupational hygienist in strict accordance with all applicable legislation, regulations, policies and guidelines.

As an additional precautionary measure, the occupational hygienist will be on-site at all times during these works to oversee its safe removal. Further testing will also be completed to ensure the area has been fully remediated and the school will receive a clearance certificate before the area is open for construction works to continue.

Please be assured the removal of this material does not pose a risk to students, school staff and the community.

A comprehensive COVID-19 Safety Plan is in place for the site and the contractor will enforce strict compliance with the Public Health Order. Our construction sites will follow all current health guidelines.

The health, safety, and well-being of the school and the local community is our highest priority and we will continue to keep the community updated.

Thank you for your cooperation during this important work.
