

# Mosman High School upgrade

## Works notification

September 2021

We are upgrading Mosman High School to bring students the latest educational facilities.

### Early works

Phase two of the early works for the Mosman High School upgrade will start on Monday 20 September 2021, the first day of the school holidays to minimise disruption to the operation of the school.

The works include installing four temporary classrooms, an administration office and a library with adjoining student amenities. Once installed, these buildings will be used by students during the remainder of the upgrade while new facilities are being built.

This work may be noisy at times however measures will be in place to reduce disruption to the local community.

As the health and safety of the community is our highest priority, temporary fencing will be installed around the site to secure the area and prevent public access.

### Working hours

Our work hours are 7 am to 6 pm Monday to Friday, 7 am to 5 pm Saturday and 9 am to 5 pm Sundays and public holidays.

These extended work hours are enabled under the recently released NSW Government legislation, the Environmental Planning and Assessment (COVID-19 Development-Construction Work Days) Order (No 3) 2021. This legislation was granted to protect the health, safety and welfare of construction workers and our community during the COVID-19 pandemic.

The site also has a comprehensive COVID-19 Safety Plan in place and our contractor is enforcing strict compliance, including not allowing workers on-site from LGAs of concern with the exception of authorised workers allowed under a Public Health Order. Our construction sites are also following all current health guidelines, including all workers wearing masks both indoors and out.

Thank you for your patience while we deliver this important school infrastructure project.

### Next steps

The new temporary buildings are anticipated to be operational in Term 4.

Main works construction is anticipated to start in late 2021. A virtual information session will be held prior to main works construction starting to share more information about the construction activities and the operation of the school while this work is carried out.

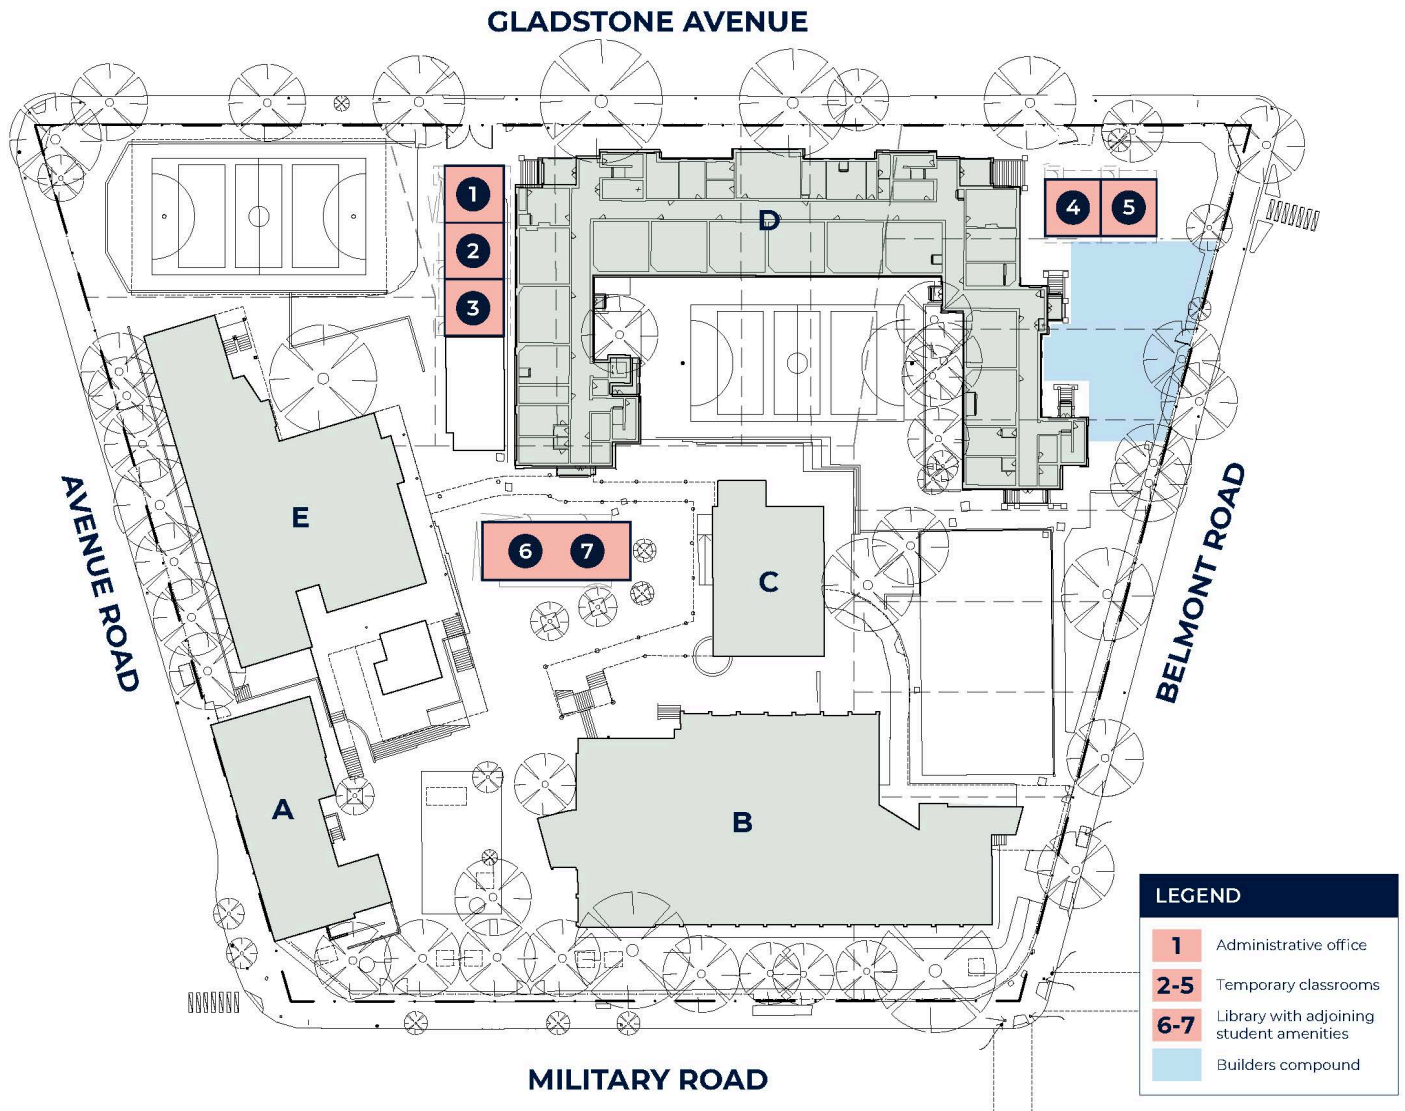

See map overleaf for the location of the temporary buildings and builders' compound.
