

Progress summary

Concept and schematic design is complete. The construction contract has been awarded to Zauner Construction. Detailed design has commenced, progressing into construction once a Complying Development Certificate (CDC) is obtained, which is likely to be mid to late 2019.

Site establishment – commencing soon

Site establishment and minor early works to prepare the sites for construction will commence from late August 2019. This will include the erection of site fencing and signage, the setup of site facilities, installation of site access points and the commencement of preparation works for building conversions and refurbishments. Demountables have already been installed to provide temporary student accommodation during the construction period.

Construction impacts

The safety and wellbeing of the community is our priority and we will employ a range of measures to manage and control the construction impacts to the school and wider community.

- Fencing and shade cloth will be erected to reduce dust and noise impacts on the school and our neighbours.
- Dust from demolition and construction works will be hosed down with water as required. Trucks entering and leaving the site will cover their loads.
- Notifications to the school community and surrounding neighbours will be issued prior to works. Any potentially disruptive tasks will be undertaken during non-school hours.

Murrumbidgee Regional High School upgrade

Information Pack

August 2019

Investing in our schools

The NSW Government is investing \$6.7 billion over the next four years to deliver 190 new and upgraded schools to support communities across NSW. In addition, a record \$1.3 billion is being spent on school maintenance over five years. This is the largest investment in public education infrastructure in the history of NSW.

Murrumbidgee Regional High School, the new high school model for Griffith

As part of the new high school model for Griffith, Murrumbidgee Regional High School will be receiving upgrade works across both sites, which will enable all students to have access to a wide range of subject options and school facilities. The project will involve:

Griffith site

Conversion of existing rooms into flexible learning spaces

New administration and staff collaboration area

New administration reception

New outdoor decking area to increase opportunities for outdoor learning

Wade site

Conversion of existing building into a new library with multi-purpose learning spaces and performance and lecture area

Conversion of existing building into a new canteen and flexible learning areas

Refurbishment of the current library to create a new study and collaboration area for all teaching staff.

# Project timeline

Mid 2019	●	Concept and schematic design complete
Mid 2019	○	Construction tender awarded
Mid 2019	○	Commence detailed design
Mid 2019	○	Community information session and ongoing engagement
Mid-late 2019	○	Obtain Complying Development Certificate (CDC)
Mid-late 2019	○	Early construction works commence
Late 2019	○	Detailed design complete
Late 2019	○	Main construction works commence
Late 2020	○	Construction complete
Early 2021	●	Official opening
