

Example of learning environments being delivered across NSW

Murwillumbah Education Campus

Project update

September 2021

Investing in our schools

The NSW Government is investing \$7.9 billion over the next four years, continuing its program to deliver 215 new and upgraded schools to support communities across NSW. This is the largest investment in public education infrastructure in the history of NSW. The NSW Department of Education is committed to delivering new and upgraded schools for communities across NSW. The delivery of these important projects is essential to the future learning needs of our students and supports growth in the local economy.

Project overview

The NSW Department of Education is planning for a new primary school and a new high school which will be located on the same campus at the current Murwillumbah High School site. This project will enhance public education in Murwillumbah by supporting contemporary teaching approaches and providing students with access to new, modern, flexible learning environments and facilities.

The educational vision, values and learning principles for the campus have now been agreed in consultation with staff and the concept design for the campus has been developed.

Virtual information session

We are committed to keeping the community informed about this important project.

While we are currently unable to hold face-to-face community information sessions to protect the health and safety of our staff, students and community, a virtual information session will be held to provide information about the progress of the project. In the virtual room you will also be able to book a phone meeting or submit feedback and questions.

The virtual information session will be open online from noon on Monday 13 September to 5 pm on Friday 17 September 2021. To access the virtual room visit edu.nsw.link/MEC or scan the QR code. The materials from the room will also be available on our website.
