

Murwillumbah High School

Welcome Pack – February 2025

New front entry and office

Welcome to your upgraded school

We are excited to welcome students and staff back to upgraded facilities at Murwillumbah High School, including:

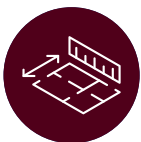

refurbished classrooms with new walls, ceilings, flooring, furniture, fixtures and fittings

refurbished specialist spaces, including science labs, wood and metal workshops and food tech kitchen

a new Inclusive Education Hub created by repurposing Block H

reconfigured and upgraded front office, staff and administrative spaces

refreshed outdoor areas with new exterior paint, repairs and landscaping

refreshed school library and hall

Ongoing works

Most of the building works are complete and the school has more than enough refurbished classrooms and specialist spaces to accommodate students and support the delivery of the timetable. To fully complete the upgrade, work on some parts of the site will continue during Terms 1 and 2, including:

- refurbishing Block B, which required some additional structural repairs prior to internal works
- some exterior works and landscaping

- finishing and handing over the new student canteen
- installing and commissioning a new electrical substation.

School Infrastructure is working with school leadership to make sure the school operates safely while work is completed. Thank you for your patience.

New electrical substation

As part of the project, School Infrastructure is working with Essential Energy to upgrade local electrical infrastructure so it can provide the electrical load needed to power the refurbished Murwillumbah High School. One of the key elements of the upgrade is a new electrical substation which is currently being manufactured offsite.

To ensure the school operates smoothly until the new substation is operational, Murwillumbah High School is implementing a power load management plan. The strategic use of power involves prioritising essential school operations to minimise disruption to students and staff while ensuring comfort and efficiency.

Frequently asked questions

Where should students and visitors park?

While works are continuing, onsite parking will be limited, with what is currently available allocated to staff parking only. To assist, student drop off is allowed near the pedestrian entry on Nullum Street. Students who wish to drive to school, and visitors arriving during bus drop off and pick up times, should use on street parking. Outside of bus arrival and departure times, visitors can park in the bus bay areas on Nullum Street. Please refer to street signs for guidance.

How do I find out about school bus routes and timetables?

Murwillumbah High School is served by several school bus routes. The department has worked with Transport for NSW and the various bus operators to ensure the network meets the needs of the school community and it is expected that there will only be minimal changes to existing stops and routes. For specific information based on your home address, contact the relevant bus operator directly or check their website.

Where is the student canteen located?

A new permanent student canteen has been built at the end of Block D, however during Term 1 this will be adjacent to the construction zone and therefore out of bounds. A temporary canteen will operate out of the school hall in Block M to provide service to students.

Access to the Inclusive Education Hub

Block H has been completely redeveloped to create new classrooms and facilities for the Inclusive Education Hub. A footpath, driveway and turning circle have been created inside the school grounds to provide access. The driveway is accessible from the Riverview Street entry. This area is for student drop off only. Visitors to the Inclusive Education Hub who need to park for longer should use on street parking around the school.
