|                      |                     |                        |                                     | The health, safety, and wellbeing of the school<br>and the local community are our highest<br>priorities, and we have taken the following<br>steps:   |                     |                                   |
|                      |                     |                        |                                     | - A traffic management team is now in<br>operation to monitor contractor parking and<br>general traffic behaviour. Speeding vehicles will<br>be noted and action taken.   |                     |                                   |
|                      |                     |                        | Contactor behaviour and speeding    | - The notes you provided have been added to the toolbox talks for contractors.  |                     |                                   |
| 27 June 2024         | 3 July 2024         | Email                  | Site tidiness                       | - A weekly walk around the site for a general tidy up will commence this week.  | Closed              | No                                |
|                      |                     |                        |                                     | A traffic management team is on site from 6am<br>to ensure construction workers are parking<br>appropriately and to monitor general traffic<br>behaviour. The traffic management team have<br>not noticed or have been advised of loud music<br>in the early morning. |                     |                                   |
|                      | 8 August            | Email to               | Contractor behaviour and<br>parking | We have also been unable to verify the<br>allegations of tool use prior to 7am, however we  |                     |                                   |
| 30 July 2024         | 2024                | DPHI                   | Noisy works before 7am              | believe that it is unlikely to have originated from<br>the site given all workers are made aware of the   | Closed              | No                                |

| Date of<br>complaint | Date of response         | Method of complaint | Nature of complaint                     | SINSW response   | Complaint<br>status | Is this complaint<br>an emergency |
|----------------------|--------------------------|---------------------|---|--|---------------------|-----------------------------------|
|                      |                          |                     |   | site hours during induction in line with the<br>conditions of consent and we have a daily site<br>wide meeting that takes place at 7am with all<br>site operatives.  |                     |                                   |
| 30 July 2024         | 8 August<br>2024         | Email to<br>DPHI    | Noisy works at 8pm                      | Noise monitoring results for Friday 26th July<br>2024 were provided. A review of the monitoring<br>during the 7:30pm to 8:30pm indicates that an<br>exceedance has occurred. Review of the audio<br>file indicates that a motorbike along Kaluta<br>Avenue occurred around 8:07pm. The audio file<br>for this event was also attached and the<br>direction of the noise showed the event<br>occurred outside the site boundary. Therefore,<br>whilst the onsite noise monitoring indicates an<br>exceedance this is not related to construction<br>activity. | Closed              | Νο                                |
