

Narrabeen Sports High School upgrade

Project update | August 2023

Project overview

The new NSW Government is committed to delivering much-needed upgrades at Narrabeen Sports High School.

In the first week of Term 3, School Infrastructure NSW met with the school's leadership to confirm their priorities and make sure that the upgrades meet the needs of the students and staff.

As an outcome of this discussion, it has been decided that the upgrade will include essential and urgent maintenance including the following:

- renewal and repairs for the science labs, prep rooms, and chemical storerooms in Block B
- replacement of all roofs in Blocks A, B, C, D and E
- refurbishment of student and staff amenities (bathrooms and changerooms)
- upgraded technological and applied studies classrooms in Block A
- refurbishment of existing classrooms within Block C
- refurbishment of Block K including data upgrades.

Discussions with the school about future upgrades to core facilities are continuing.

Progress summary

We expect to award the contract to complete the refurbishment of the science labs, prep rooms, and chemical storerooms in Block B in early August 2023. Works will start shortly after this and are expected to be finished by late 2023.

Stage 1 of the roof works will involve replacing all roofs with new material in Blocks A, E and D, including external walkways. Procurement has started and we expect to commence these works in Term 3, 2023.

Stage 2 of the roof works will involve replacing all roofs, including coverings in corridors, in Blocks B and C. We are still developing a schedule for these works and will notify the community closer to the works starting.

Next steps

Procurement for refurbishment of the student amenities will start in August 2023. We expect to finish these works by the end of 2023.

The contracts to complete the refurbishment works of the TAS classrooms in Block A, Block C classrooms, and the new classrooms in Block K will be released later in 2023. Works are expected to start in late 2023 or early 2024 and will be completed throughout 2024.

Essential and urgent maintenance will be prioritised.

Construction work hours

Standard working hours will be 7 am to 6 pm Monday to Friday, and 8 am to 1 pm on Saturdays. No work will take place on Sundays or public holidays unless otherwise advised.

Managing construction impacts

Noise, vibration and dust impacts will be managed carefully while works are taking place in order to minimise any potential disruption to student learning. Construction will take place progressively in planned stages across the school and we will conduct all work in accordance with the project's environmental management plans.

The impact of construction work on student learning is an issue we treat with the highest priority. We will work closely with the principal to program noisy works appropriately with consideration given to sensitive periods for the school such as exams.

For more information about how we manage impacts from construction in the community and our schools, visit our fact sheet: www.schoolinfrastructure.nsw.gov.au/construction-impacts.html

How can I get involved in the project?

We are committed to working together with our school communities and other stakeholders to deliver the best possible learning facilities for students. Your feedback on this project is important to us. For more information, questions, or to make a comment please contact us at the details below. Further updates will be released as the project progresses.
