Investing in our schools

As part of the NSW Government's plan to rebuild public education, the NSW Budget is delivering record education funding, including $9 billion for new and upgraded schools. This targeted investment will ensure growing communities get access to a world class public education.

Project overview

A project is underway to upgrade Narrabeen Sports High School.

We have already completed upgrades and refurbishments to general classrooms, technical and applied studies (TAS) classrooms, science labs, changerooms and amenities, in addition to roof replacements on most buildings.

The next stage of the upgrade will deliver a new professionally-equipped performance hall which will include:

- **a central main auditorium with mezzanine and tiered seating for 400 guests**
- **a large stage at the front with backstage/band room**
- **a designated rehearsal space at the back of the hall**
- **a control room with professional quality audio and lighting**
- **male and female changerooms with amenities**
- **a covered entry with a foyer and lift**

The new performance hall

This new performance hall will serve as a vibrant creative hub, fostering a rich environment for artistic expression and collaboration. Students will have a dedicated space to explore their creative talents, enhancing their education through performances, exhibitions, and workshops.

This new building will be single-storey with a mezzanine level with seating for approximately 400 guests.

Project timeline - new performance hall

We are here

Concept design	Planning approval process	Construction tender released	Construction contract awarded	Construction starts	Construction completion
August 2025	October 2025	November 2025	January 2026	Early 2026	Early 2027

Narrabeen Sports High School upgrade - progress summary

The upgrades to Narrabeen Sports High School have been carried out in stages to ensure students can remain focused on their subjects with minimal disruption to their day-to-day activities.

The upgrades to the technical and applied studies (TAS) classrooms have greatly enhanced student learning by providing a state-of-the-art environment that students feel proud to work in.

The upgrades have increased functionality with better lighting, easier access and improved storage options. Students can use new machinery with upgraded dust and fume extraction in the woodwork and metalwork rooms, better preparing them for the real-world environment.

There have also been upgrades to the science faculty with renewal of the science labs, prep rooms and chemical storerooms. These works have improved the overall learning environment for students, allowing them to engage with science in a more effective and enjoyable way.

Upgrades have also been completed to the classrooms and amenities in Block E and the amenities and change rooms in Blocks A and D, further improving the overall aesthetic and the pride students and staff feel in their school environment.

The refurbishment of classrooms in Block C is currently underway and will include installing new flooring, ceiling and wall finishes. This is expected to be complete by Day 1 Term 1, 2026.

The refurbishment of classrooms in Block K, including 2 acoustically treated music rooms and a smaller performance space with a sprung wooden floor, will commence in November 2025 to avoid disruption to Year 12 students undertaking their HSC exams. This is expected to be complete in early 2026.

Upgraded wood technology room

Upgraded science lab

Upgraded toilets in Block A

Upgraded change rooms in Block B
