The NSW Government is investing \$7.9 billion over the next four years, continuing its program to deliver 215 new and upgraded schools to support communities across NSW. This is the largest investment in public education infrastructure in the history of NSW.

The NSW Department of Education is committed to delivering new and upgraded schools for communities across NSW. The delivery of these important projects is essential to the future learning needs of our students and supports growth in the local economy.

The new high school will have modern facilities to accommodate more than 450 students and will include:

Library

Canteen

Hall

Playing courts

Agricultural Plot

Kiss and drop zones

Project overview

Planning is underway for the establishment of a new high school in Bungendore to accommodate more than 450 students and to upgrade facilities at Bungendore Public School.

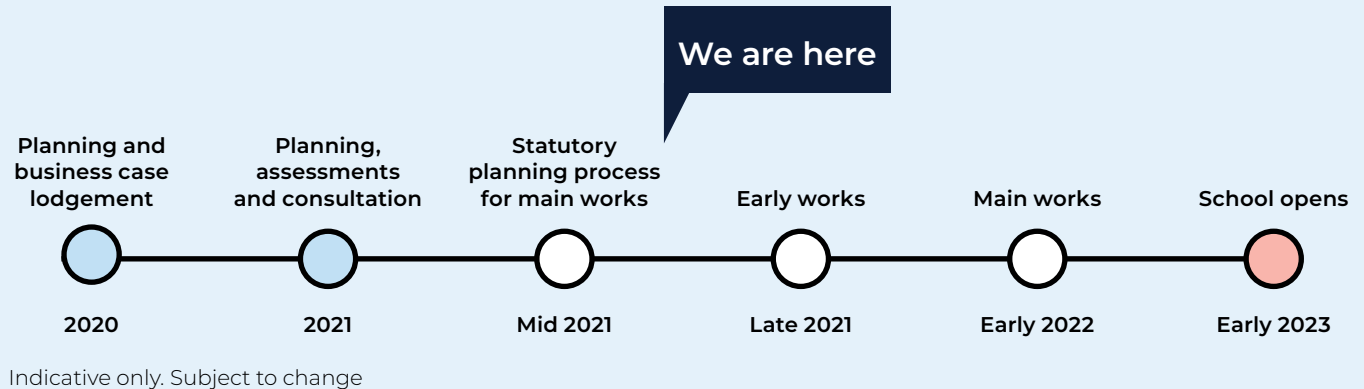

The new high school will have modern facilities with 24 flexible learning spaces including 3 support learning spaces, a library, hall, school canteen, playing courts, an agricultural plot, and kiss and drop zones.

Learning spaces will be built to enable teaching of English, Mathematics, Science, Technologies, Human Society and its Environment (HSIE), Personal Development, Health and Physical Education (PDHPE), Creative Arts, Languages, Vocational Education and Training (VET), and Agriculture.

As part of the high school project there will also be new community facilities, additional local car parking and updated storage facilities for the scout hall.

Bungendore Public School will also receive upgrades including to the existing playing field, a new amenities block and new field lighting. Additional teaching spaces are also to be created at Bungendore Public School.

Frequently Asked Questions

What happens next?

The Environmental Impact Statement and the State Significant Development (SSD) application have been lodged and will be on public exhibition.

The community and other stakeholders can formally provide comments via the Department of Planning, Industry and Environment (DPIE) Portal. Construction work can start on the high school site after the SSD application is approved.

What is a State Significant Development (SSD) application?

SSD applications are used for projects that have special significance to the people and State of NSW.

The Department of Planning, Industry and Environment (DPIE) is responsible for the planning approval process for SSD applications, rather than a local council.

How can I find out more about the SSD application?

You can find detailed information about the SSD application by going to the DPIE's website: www.planningportal.nsw.gov.au/major-projects/project/41186.

How can I provide feedback on the SSD application?

If you would like to provide feedback, make a formal submission during the exhibition period by following the 'Make a Submission' link at www.planningportal.nsw.gov.au/major-projects/project/41186.

All feedback on the SSD application should be directed to DPIE via this link.

Can design amendments be made following the lodgement of the SSD application?

Yes. Before the SSD application is determined, amendments can be made to improve the design, reduce the impacts of the project, and/or respond to issues if required.

Modifications can also be made following the SSD determination. Amendments and modifications will be shared with the community.

How many students will the high school accommodate?

The new high school will have modern facilities to accommodate more than 450 students.

What is the proposed catchment area for the new high school?

The Department of Education will confirm the school catchment area closer to the school opening using the most current demographic data.

When will the new high school open?

The new high school will open in early 2023, subject to planning approvals.

Online Information Session

An online information session will be live from 9 am Monday 20 September to 5 pm Sunday 26 September 2021. Here, you will find information about the project, including the design and site layout.

You can access the session from the project webpage: www.schoolinfrastructure.nsw.gov.au/projects/n/new-high-school-in-bungendore.html.
