

# Project overview

The new high school will have modern facilities with 25 flexible learning spaces including 3 support learning spaces, library, multi-purpose hall, sports courts, covered outdoor learning area (COLA), outdoor space, canteen, and administration facilities. Learning spaces will be built to enable teaching of subjects offered by secondary schools so that students can receive their Record of School Achievement or Higher School Certificate. The school will also offer vocational education and training (VET) programs. The design of the new high school anticipates the need for potential future growth with core facilities sized to facilitate expansion if necessary. The new high school in Jerrabomberra will be a 7-12 comprehensive high school.

# Designed around teaching and learning

These buildings contain 25 learning spaces to accommodate approximately 500 students. This includes 3 learning spaces that are dedicated to Specialist Support Classes as well as general learning spaces (GLS), a library and a multi-purpose hall, sports courts, covered outdoor learning area (COLA), outdoor space, canteen, and administration facilities. The design is arranged by learning units that are focused on discipline-based learning neighborhoods. General learning spaces are flexibly connected allowing students to work in varied group sizes and move between indoor and outdoor learning spaces.
