

# Jerrabomberra High School

## Works notification

15 August 2022

A project is underway to build a new high school in Jerrabomberra. The new high school will have modern facilities, with 25 flexible learning spaces including 3 support learning spaces, to accommodate approximately 500 students and will deliver:

- library
- multi-purpose hall
- sports courts
- covered outdoor learning area
- outdoor space
- canteen
- administration facilities.

### Jerrabomberra High School main works

Site establishment is underway and the main earthmoving works are scheduled to start on the site in the week commencing Monday 22 August 2022.

As part of these works, large vehicles will be onsite, including excavators, trucks, and site vehicles. Traffic controllers will be in place when required to guide the vehicles on to the site and prioritise pedestrian safety. There will be no changes to traffic in the area.

Following earthmoving works, installation of in-ground services and footing construction will start.

### Working hours

Under the conditions of consent, all work, including building/demolition and excavation work, and activities in the vicinity of the site generating noise, must only be carried out between 7 am and 6 pm on Mondays to Fridays, and 8 am and 1 pm on Saturdays. Works may also be undertaken between 6 pm and 7 pm, Mondays to Fridays and between 1 pm and 4 pm, Saturdays provided noise levels do not exceed the existing background noise level by more than 5 decibels.

No work must be carried out on Sundays or public holidays, unless approved prior by the consent authority.

### How will noise, dust, and vibration be managed during construction?

Noise, dust and vibration created by the site works will be appropriately managed throughout construction in accordance with the State Significant Development consent conditions. Construction noise levels will be managed in accordance with the NSW DECC Interim Construction Noise Guideline (2009) to keep noise to a minimum. Dust as a result of excavation and other activities will be managed appropriately, including hosing of exposed earth as required, and trucks arriving and departing the site will have their loads covered. Vibration will be managed within acceptable levels so that there is no adverse impact on neighbouring properties.

### **How will traffic impacts be managed during construction?**

Movement of construction vehicles will be compliant with the Construction Traffic and Pedestrian Management plan, and in accordance with the State Significant Development consent conditions to ensure pedestrian and public safety.

### **Health and safety during construction**

All work will be undertaken in accordance with SafeWork NSW regulations. All construction impacts will be controlled in accordance with the relevant management plans. The health and safety of the workers and community are our highest priority.

If you have any concerns about this project, you can contact School Infrastructure NSW during business hours on 1300 482 651. In an emergency, call triple zero (000). We are here to make sure that work is completed safely and efficiently and we will minimise impacts on the community at every opportunity.

Thank you for your patience while we deliver this important school infrastructure.
