

Newcastle East Public School

Works notification

21 August 2020

Update on work at Newcastle East Public School

To keep the community informed during ongoing construction and remediation work, we will continue to produce weekly updates. The notification will provide both a weekly look ahead of work and confirm the upcoming weekend works.

Playground Upgrade

Between Monday 24 August 2020 and Sunday 31 August 2020 work will include:

- Piling work for new retaining wall including drilling of holes and pouring of concrete
- Stormwater improvement works including excavation of soil and installing new pits and pipes
- Removal of contaminated soil and importing of clean fill - no contaminated soil will be removed during school hours.

Within the construction site movement of plant and equipment will be minimised as much possible during school hours and will be restricted to areas that are currently encapsulated with mulch. Continual air monitoring will be in place during the work.

Reminder: managing contaminated soils (ongoing weekend work)

Weekend work causing disturbance to contaminated material including stump removal, piling work, excavation work and removal of contaminated soil from site will continue to take place during the upgrade of the playground.

The hours of work for the next two weekends include:

- Saturday 22 August 2020 and Sunday 23 August 2020 between 8.00am to 5.00pm
- Saturday 29 August 2020 and Sunday 30 August 2020 between 7.00am to 6.00pm

An independent hygienist will be on site during any remediation activities including excavation of contaminated materials.

Air monitors will continue to be in place during the work including on both the western boundary and the shared southern boundary between the school playground and the neighbouring properties.

The carting of material off site will be done over weekends and during school holidays as required. At times, the material will also need to be temporarily stockpiled within the construction site and encapsulated with plastic sheeting bound down by weights.

The work will be done in accordance with the Department of Education's Asbestos Management Plan and SafeWork NSW regulations. All work will be completed by licensed and accredited asbestos removalist and monitored by occupational hygienists in strict accordance with all applicable legislation, regulations, policies and guidelines.

Refurbishment of block A (heritage building)

Tenders have now closed for the delivery of additional refurbishment work to block A and are currently being assessed. A departmental contractor will begin some preliminary painting works next week, with the new contractor to commence in early September 2020.

Hours of work

In line with the NSW Environmental Planning and Assessment (COVID-19 Development – _Construction Work Days) Order 2020, School Infrastructure NSW construction sites can now operate on weekends and public holidays during the COVID-19 pandemic. This is to allow workers to maintain social distancing while on construction sites by distributing building work across the entire week.

Works will typically take place from 7:00am to 5:00pm Monday to Friday and from 8:00am to 5:00pm Saturdays and Sundays, unless otherwise notified.

Keeping you updated

In March 2020, the NSW Government introduced proactive measures, including social distancing, to limit the impact of novel coronavirus (COVID-19) on schools and communities. Social distancing resulted in changes to the way we engage with the community. Instead of face-to-face discussions we will deliver notifications to your letterbox or via the Skoolbag app. Community members are invited to discuss the work over the phone and email. Additional information boards about the playground work will also be placed on the fencing around the school.

FAQs relating to the playground upgrade are available on the Schools Infrastructure NSW website at <https://www.schoolinfrastructure.nsw.gov.au/projects/n/newcastle-east-public-school.html#library-tab>

The health, safety, and well-being of the school and the local community is our highest priority. Please be assured that the removal of this material will not pose a risk to the local community. We will continue to provide further information as this work progresses.

We look forward to delivering this exciting upgrade for the school community.
