

Newcastle High School

Works notification | 19 August 2024

A project is underway to redevelop Newcastle High School to cater for the growing population in the region.

Footpath closure from Monday 26 August 2024

As part of the redevelopment project, an electrical substation kiosk will be installed on the school site to cater for increased electrical demand.

The works will take place from Monday 26 August to Wednesday 11 September 2024.

Works will include installing cables along National Park Street footpath to connect the substation to existing Ausgrid electrical infrastructure.

During the works, a small section of the National Park Street footpath alongside the school boundary will be temporarily closed (see map overleaf for exact location). Traffic controllers will be in place to maintain pedestrian safety and minimise impacts to traffic flow.

Please note, the footpath on the opposite side of National Park Street to the school will remain open for pedestrian access. We will work to minimise any inconvenience that may be caused by these necessary works.

Completion of the substation

Following the completion of the works, school fencing will be re-installed behind the new substation to allow authorised technicians to have direct access from the public footpath.

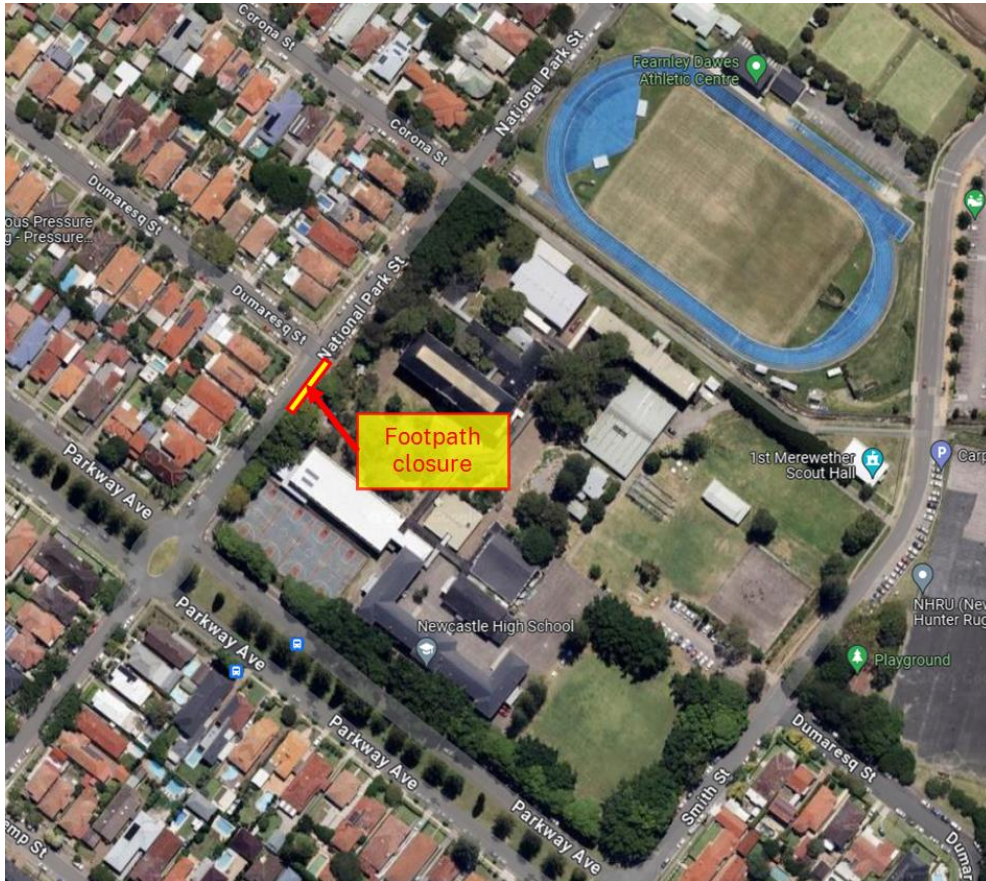

Example of school fencing around substation.

Location of footpath closure

If you have any questions about the redevelopment of Newcastle High School please contact us during business hours via the details below.

Thank you for your patience while we deliver this important project for the Newcastle community.

Managing construction impacts

The safety of the school's students, staff, visitors and the local community is our highest priority. Construction is planned so there is minimal impact on school operations. Safety measures are in place to separate the construction site from areas occupied by the school and ensure students are unable to enter construction areas. There is regular consultation with the school to discuss construction progress.

For more information about how we manage construction impacts please visit our webpage at edu.nsw.link/ConstructionImpacts or scan the QR code below.
