

Newcastle High School

Works notification | 9 January 2025

A project is underway to redevelop Newcastle High School to cater for the growing population in the region.

Road closure for the removal of London Plane trees

On Tuesday 14 January 2025, 2 London Plane trees will be removed from within the school site. The trees are being removed due to their condition and confirmation from an independent arborist that they cannot be saved.

During the tree removal, a section of National Park Street will be temporarily closed to pedestrians and vehicles to enable specialised machinery and equipment to be used (see map overleaf). Authorised traffic controllers will be in place to maintain pedestrian safety and manage access for residents to properties in the sectioned area of the street.

Footpath closure and substation works

Additional works for the new electrical substation kiosk will take place from Tuesday 28 January 2025 to Thursday 30 January 2025.

The works will involve digging trenches along the footpath on National Park Street to connect high-voltage cabling. The trenches will be filled in once the works are completed.

During the works, a small section of the National Park Street footpath alongside the school boundary will be temporarily closed (see map overleaf). Authorised traffic controllers will be in place to maintain pedestrian safety and minimise impacts to traffic flow.

Please note, the footpath on the opposite side of National Park Street will remain open for pedestrian access.

Work hours

All works will take place during standard approved construction hours for this project from Monday to Friday, between 7 am to 6 pm and Saturdays between 8 am and 1 pm. In the event of poor weather conditions, the works may be rescheduled.

We will work to minimise any inconvenience that may be caused by these necessary works.

Thank you for your patience as we continue to deliver this important project for the Newcastle community.
