

Warialda Public School

Works notification | 14 May 2025

100 new public preschools

Work is underway to deliver a new public preschool at Warialda Public School. The new public preschool will provide a safe and engaging environment for preschool children. It will feature specially designed rooms and a quality outdoor play area.

Upcoming geotechnical investigation works

On 7 April, we advised that testing and environmental investigations would be carried out at your school from 14 April. These works are now scheduled for Tuesday 20 May, weather permitting.

We are working closely with the school leadership to minimise any disruption to school operations, and the timing has been carefully chosen to reduce impacts on students and staff.

The purpose of these investigations is to obtain information on the conditions underlying the site, as well as to identify and mark any below-ground services. This will help inform the planning and design of the new public preschool.

Work will involve drilling a small number of boreholes using a vehicle-mounted drilling rig and digging a few small test pits across the preschool site. All surfaces will be restored upon completion.

To ensure safety, the work area will be cordoned off and inaccessible to staff and students during the works.

We anticipate minimal disruption, with noise levels similar to that of a commercial lawnmower.

If you have any queries relating to this work, please contact us using the contact information below.

Thank you for your patience while we deliver this important preschool infrastructure.
