

Schofields Public School Upgrade

School holidays works notification | 28 June 2023

Planning is underway to upgrade Schofields Public School to meet current population needs and future enrolment growth.

Site investigations over the winter school holidays

On Tuesday, 11 July 2023, during the July school holidays, contractors will be on-site to carry out geotechnical and contamination site investigations. These will inform planning and design for the Schofields Public School upgrade (please see map overleaf).

Several boreholes will be made across the site using a drill rig and a truck carrying drill rods and water will be used as a support vehicle. The equipment used will be roughly as loud as a commercial lawnmower. The test areas will be reinstated to their current condition following the works.

Safety measures and air monitoring have been put in place to ensure there is no risk to the local community or animals on site. This work is expected to take approximately one day to complete, weather permitting. As a precaution, all work areas will be cordoned off during drilling works to ensure public safety.

Work hours

Working hours will be 7am to 5pm.

Ongoing site inspections

Over the coming months, our project team and contractors, such as architects and engineers, will conduct several site visits to undertake a range of site investigations as part of their planning and design work.

Contact us

If you have any questions about this project you can contact School Infrastructure NSW on email at schoolinfrastructure@det.nsw.edu.au or during business hours on 1300 482 651.
