

# Schofields Public School upgrade

## Works notification | 28 March 2025

As part of the NSW Government's plan to rebuild essential services, a project is underway to upgrade Schofields Public School with the construction of a new, purpose-built three-storey building.

### Site establishment works

Site establishment and ground works for the new building at Schofields Public School will begin on Tuesday 1 April from 7 am. There will be increased traffic around the school as the builder prepares for construction works.

Site establishment works include:

- installing temporary fencing around the site perimeter
- setting up site office sheds and facilities for the workers including walkways and amenities
- establishing temporary power and water supply to the site
- earthworks activities, such as site investigations, digging trenches and excavation works, stripping the topsoil, and building retaining walls

The builder and contractors will access the construction site via Gate 10 off Station Street, which will serve as the main entry point to restrict public access and maintain a safe distance from the school, see map below.

A new gate will be installed next to the existing Gate 10, to maintain access for parents and students into the school from Station Street, see map below.

Please be aware that some noise impacts are expected during these works.

### Working hours

All works will take place from Monday to Friday from 7 am to 6 pm and on Saturdays from 8 am to 3 pm. No work will take place on Sundays or public holidays unless otherwise advised.

### Managing construction impacts

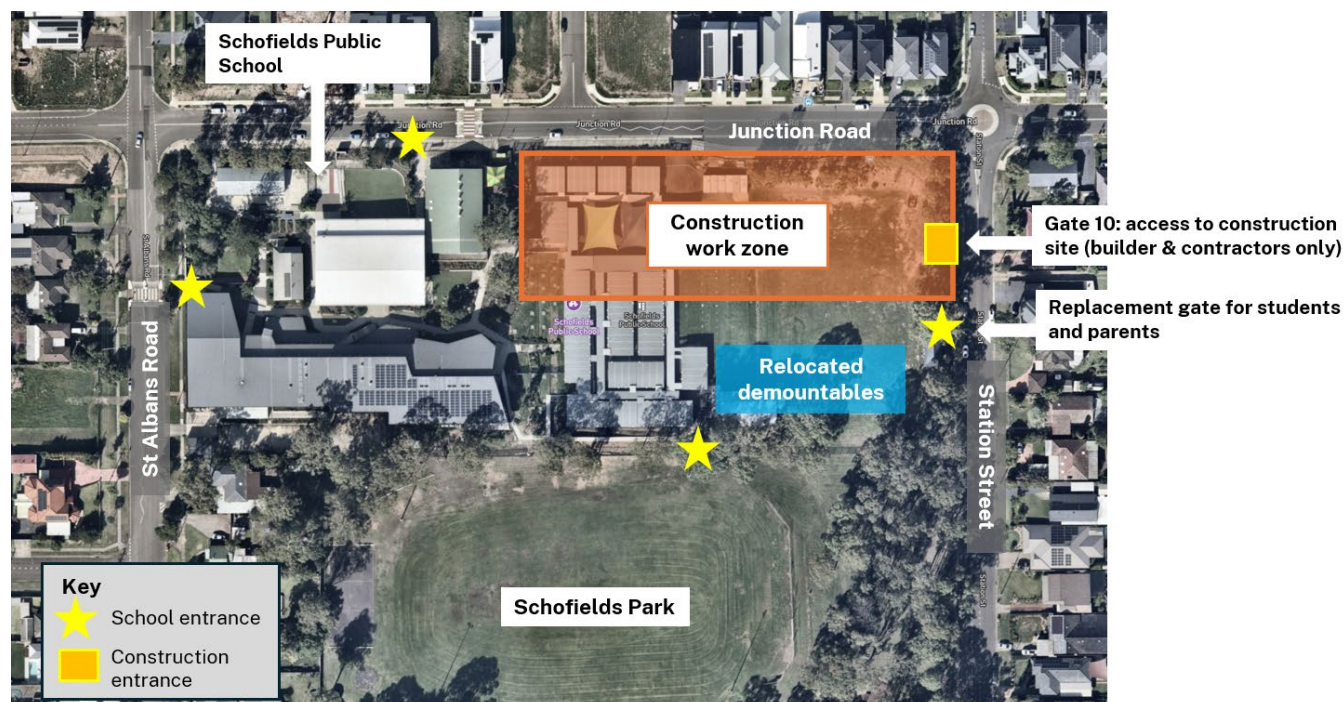

School Infrastructure will work with the contractor to manage and reduce any potential construction impacts including noise, vibration, dust, and traffic changes.
