Seven Hills High School: VET facility

Project update | August 2023

Project overview

Seven Hills High School is being upgraded to provide a new Vocational Innovation Centre (VIC). These specialist vocational education and training (VET) facilities will provide students with the skills, support and access to trades and vocational pathways that will enable them to succeed in the 21st century.

TAFE NSW will deliver Individual support (ageing), Electrotechnology and Drainage (pre-plumbing course) as Vocational and Educational (VET) courses on campus in the VIC. Supply chain operations will be taught from 2024.

Seven Hills High School will deliver Business services, Financial services and Entertainment (live production and technical services) as Vocational and Education and Training (VET) courses on campus in the VIC. Sports Coaching will be taught from 2024.

Progress summary

The VIC is finished, and we continue to work with Blacktown City Council so that the new building can open as soon as possible. Students are continuing to attend their TAFE courses at nearby facilities for Term 3 2023.

The construction of the external walkway to connect the VIC to the rest of the high school, and all remaining landscaping work, is expected to finish in late August 2023.

Next steps

At this stage, it is expected that the VIC will open in Term 4 2023.

Drainage works within the Johnson Avenue road reserve are expected to take place later in the year.

We will continue to update the school and local community on the progress of the new Vocational Innovation Centre opening.
