

Seven Hills High School VET upgrade

Works notification | 17 November 2023

The Seven Hills High School Vocational Education and Training (VET) facility is now open. Some final drainage works are required on Johnson Avenue to finish the project, please find more information below.

Upcoming road night works – from 20 November 2023

In accordance with the project's Development Application consent conditions, a new concrete drainage pipe will be put in the ground within the Johnson Avenue Road reserve. This will require road works to take place outside the Seven Hills High School boundary from Monday 20 November 2023. It is possible some site set-up and establishment work may start before this date.

The work is expected to take approximately 6 weeks to complete. If the work continues over the Christmas period, there will be no work between Saturday 23 December 2023 and Sunday 7 January 2024.

Due to traffic impacts, it is not possible for this work to be completed during standard construction hours. Council has provided approval for the road works to take place outside of standard working hours from 9 pm to 5 am, Monday to Sunday.

The work will involve excavating a trench within the first lane of Johnson Avenue and putting in 100 metres of new concrete drainage pipe. This pipe will support the stormwater system of the new VET facility.

Traffic changes

The work will require the first lane of Johnson Avenue (the road closest to the school and pedestrian footpath) to be closed for the duration of the works, including the turning bay and bus stop. We are working with Transport for NSW and Sydney Buses to arrange temporary bus facilities during this time. The impacted lane of Johnson Avenue, the turning bay and the bus stop will be closed each night for work to take place, then reopened during the day for regular use. The pedestrian pathway will continue to operate with water filled barriers in place to ensure the safety of the community.

Traffic control personnel will be on site to assist motorists and pedestrians. For your safety, please comply with directives from the traffic control personnel managing vehicle and pedestrian movements during the works.

A traffic management plan showing the works location is provided overleaf. We will make every effort to minimise noise and disruption, however there will be unavoidable intermittent noise resulting from machinery used during trenching and installation of the drainage pipe.

We are here to make sure that work is completed safely and efficiently, and we will minimise impacts on the community at every opportunity. Thank you for your understanding during this important work.
