

Investing in our schools

The NSW Government is investing \$7 billion over the next four years, continuing its program to deliver more than 200 new and upgraded schools to support communities across NSW. This is the largest investment in public education infrastructure in the history of NSW.

The NSW Department of Education is committed to delivering new and upgraded schools for communities across NSW. The delivery of these important projects is essential to the future learning needs of our students and supports growth in the local economy.

Benefits

New specialist vocational education and training (VET) facilities with the following primary focus areas:

Vocational schools initiative

Seven Hills High School will receive industry standard training facilities and support to provide innovative curriculum pathways and options as part of a pilot program. The Vocational Schools Initiative is based on a model where vocational education and training (VET) is delivered through a combination of school-implemented courses and partnerships with TAFE NSW, industry associations and private training providers.

The initiative will provide access to specialist vocational education and training facilities which will allow students to engage in learning that builds vocational skills and facilitates pathways to apprenticeships, traineeships and trade qualifications, as well as pathways to higher education.

Purpose built facilities and vocational courses will allow students to receive industry-standard training on-site and develop the skills required to pursue careers in: Community and Health Services, Construction (Electrotechnology and Plumbing), and Transport, Logistics and Warehousing.

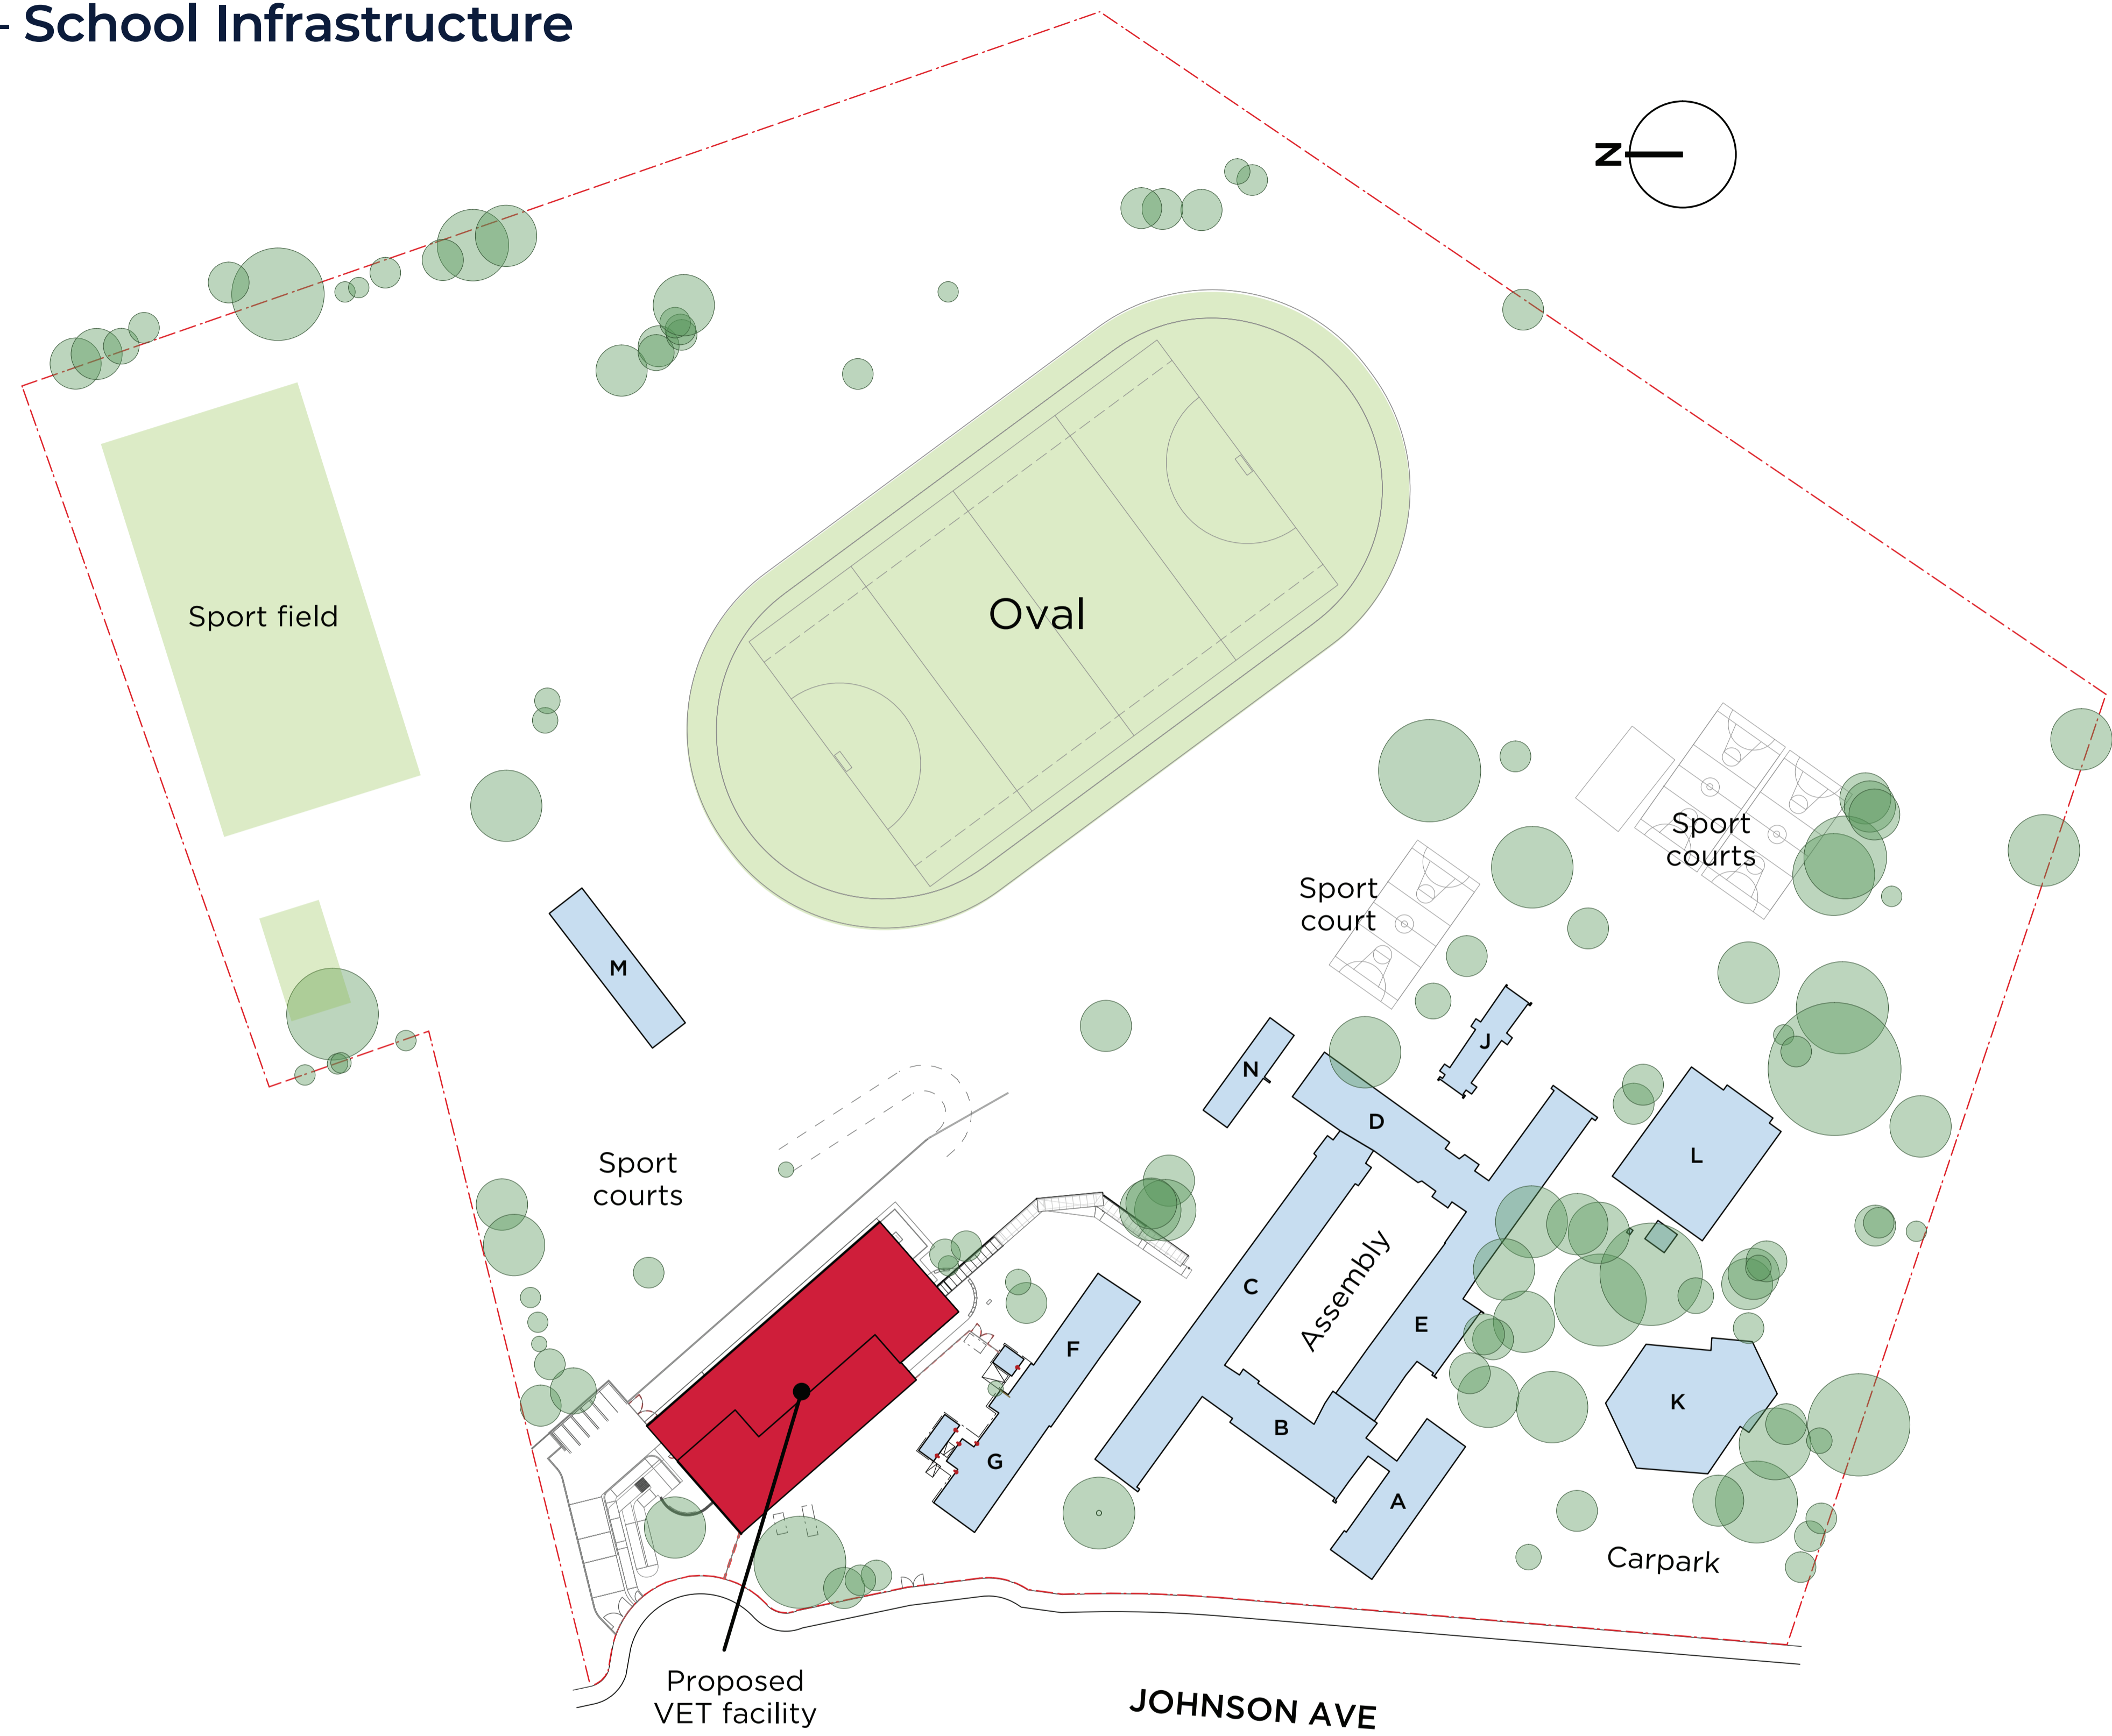

In addition to these core areas, students may have the opportunity to incorporate relevant complementary vocational courses, in areas such as business, financial and retail services, and information, digital media and technology into their studies.
