# Smalls Road new primary school Project Update

2018

## Investing in our schools

The NSW Government is spending \$6 billion over four years to deliver more than 170 new and upgraded schools. This includes an additional \$160 million in 2018/19 as part of the record \$747 million maintenance investment announced last year. This is the biggest investment in public school infrastructure in the history of NSW.

## Smalls Road new primary school

A new primary school for 1,000 students is being planned to cater for the projected enrolment growth in the area. The plans for the new school feature a three-storey building with:

- new innovative learning spaces
- special education learning spaces
- modern core facilities including a hall, library and multipurpose sports courts.

## Progress summary

The detailed design of the new primary school has been completed and the state significant development application has been granted by the Department of Planning and Environment.

## Next steps

Early site establishment including demolition works will soon be completed.

A construction contractor will be appointed for the main project build. We will work to minimise any disruptions across the project as much as possible.

Construction is due to start in November with completion expected early 2020.

We will keep you updated and provide more information as the project progresses.

You can speak to us about this project using the contact details below.
