

Speers Point Public School Upgrade

Project update

February 2020

Investing in our schools

The NSW Government is investing \$6.7 billion over four years to deliver more than 190 new and upgraded schools to support communities across NSW. In addition, a record \$1.3 billion is being spent on school maintenance over five years. This is the largest investment in public education infrastructure in the history of NSW.

Project overview

A project is underway to upgrade Speers Point Public School. The project will provide new permanent innovative learning spaces for five classes, a new hall, a new administration building and a new library.

A refurbishment of the existing library and classrooms to provide special education classrooms and easily accessible amenities was completed in early 2019.

Progress summary

Works are progressing well with the completion of all structural steel, roofing works and all internal framing for room layouts in the new administration building, new communal hall and new innovative learning spaces.

Work underway includes:

- External cladding for the new administration building, communal hall, learning spaces and new library building
- External covered circulation space steel work and associated roof works on all buildings.

The project is on track for completion in late 2020.

Working hours

Work will take place during approved hours between 7am and 5pm, Monday to Saturday. No work will take place on Sundays or public holidays unless notified. We are here to make sure that work is completed safely and efficiently, and we will minimise impacts on the community at every opportunity.

Keeping you informed

School Infrastructure NSW will continue to share construction updates and project information as the project progresses. We will provide information through information booths, project updates, our website and school newsletters.

Thank you for your patience while we deliver this important school infrastructure, to meet future growth in the area.
