

## St Ives High School

Term 1 holiday works

April 2020

### Investing in our schools

The NSW Government is investing \$6.7 billion over four years to deliver more than 190 new and upgraded schools to support communities across NSW. In addition, a record \$1.3 billion is being spent on school maintenance over five years. This is the largest investment in public education infrastructure in the history of NSW.

The NSW Department of Education is committed to delivering new and upgraded schools for communities across New South Wales. The delivery of these important projects is essential to the future learning needs of our students and supports growth in the local economy.

### St Ives High School

An upgrade is underway for St Ives High School. The project includes construction of a new multi-use indoor sports centre and refurbishment of the technical and applied studies facilities (Block C).

### Progress summary

The refurbishment of Block C has been completed and the Development Application for the new multi-use indoor sports centre has been approved by Kuring-gai Council. Earthworks to prepare the foundations of the new centre were recently completed.

### Term 1 school holiday works

Work will continue on the new centre over the holidays and will include:

- ground work, such as excavation and filling
- installing concrete piers and footings
- preparing the building's concrete slab, including formwork and reinforcement.

Due to the nature of our work, you may experience increased noise from machinery and other activities. All works will be completed within the approved hours of Monday to Friday 7:00am to 5:00pm and Saturday 8:00am to 3:00pm.

We will ensure that work is completed safely and efficiently, and disruptions are minimised.

Our contractors will ensure their teams comply with social distancing restrictions to ensure a safe workplace.

Thank you for your patience as we deliver this important project for the community.
