

St Ives High School

Project update

June 2020

Investing in our schools

The NSW Government is investing \$6.7 billion over four years to deliver more than 190 new and upgraded schools to support communities across NSW. In addition, a record \$1.3 billion is being spent on school maintenance over five years. This is the largest investment in public education infrastructure in the history of NSW.

The NSW Department of Education is committed to delivering new and upgraded schools for communities across NSW. The delivery of these important projects is essential to the future learning needs of our students and supports growth in the local economy.

St Ives High School

An upgrade is underway at St Ives High School to deliver a new multi-use sports centre.

Progress summary

The school upgrade remains on-track for completion by the end of 2020.

Work continues on the structure of the building, with the first floor concrete slab now poured and the steel structural framework being built.

A time lapse recording is being taken throughout the project. You can view the time lapse video at <https://youtu.be/NkYb8YUypjY>.

Managing the impact of our work

Due to the nature of our work, you may experience increased noise from machinery and other activities. We will ensure that work is completed safely and efficiently, and disruptions are minimised.

Our contractors will ensure their teams comply with social distancing restrictions to ensure a safe workplace.

Thank you for your patience as we deliver this important project for the community.
