St Ives indoor sports centre

Works notification | 5 December 2023

Stage 2 of the St Ives High School indoor sports centre upgrade will provide two sports courts, a multi-purpose room, male and female amenities, and a café. The second stage will be built adjacent to the first stage to provide an integrated complex of four sports courts.

Update - Remediation works continuing

As notified on 20 November 2023 remediation works at the St Ives High School indoor sports centre upgrade have begun. Investigation works have been completed. A delay in the return of results has extended the works by approximately one week. We will notify the community once remediation has been completed.

Works will involve working with soils containing asbestos materials and will be guided by the project's Remediation Action Plan.

Strict safety measures will be in place to ensure there is no risk to students, staff or the local community. The area is cordoned off within the worksite, air and dust monitoring will be in place, and there will be continual water misting of the area throughout the remediation works.

The area will be remediated in accordance with SafeWork NSW regulations and the site Remediation Action Plan. All work will be completed by licensed and accredited asbestos contractors and monitored by occupational hygienists in strict accordance with all applicable legislation, regulations, policies, and guidelines.

The area will be inspected to ensure the area has been fully remediated. The construction contractor will receive a clearance certificate from the licensed hygienist following remediation.

The health, safety, and wellbeing of the school and the local community is our highest priority, and we will continue to keep the school community and local residents updated. Thank you for your cooperation during this important work.
