

# Sutherland Public School

Works notification | 21 September 2023

## School holidays - investigation works

As part of the planning for a potential project at Sutherland Public School, investigative works around the school site are required. These works include:

- soil test investigations using a small drilling machine which will help us to determine soil structure and composition.
- work to investigate services locations.

The soil investigation work will take place in three separate locations across the school site during the school holidays at the end of Term 3 (Monday 25 September – Friday 6 October).

The map overleaf shows where the work is expected to take place.

## Working hours

The services location investigation will take place on Monday 25 September, weather permitting.

The soil investigations will take place from Wednesday 27 September - Friday 29 September, weather permitting.

## Keeping you updated

We are here to make sure that work is completed safely and efficiently, and we will minimise impacts on the community at every opportunity. Thank you for your patience while we conduct early investigations for this project.
