Investing in our schools

The NSW Government is committed to rebuilding flood affected schools in the Northern Rivers region, ensuring we build back better with flood resilient schools for local students and local communities.

Funding for the school projects has also been provided by the Infrastructure Betterment Fund, which is jointly funded by the Australian and NSW Governments through the Disaster Recovery Funding Arrangements.

Project overview

As part of this commitment, a project is underway to rebuild Tumbulgum Public School after it was extensively damaged during floods in early 2022. The project will deliver a raised and more flood resilient school for students and staff, with modern classrooms, a new library, canteen, administration spaces, and landscaping.

Move in date confirmed

We are excited to confirm that work on your new school buildings is nearly finished and the first day in the new classrooms will be **Monday, 8 December 2025**.

Over the next few weeks, the team will be putting the finishing touches on the school spaces, relocating school resources and working with school staff to get everything ready to welcome students on their first day.

Next steps

As communicated in October, once students are learning from the new buildings, we will be able to remove the temporary demountable buildings and finish landscaping the school. This includes resurfacing the playing court, repairing and returfing the school oval, and landscaping the area that the demountable buildings are now located on.

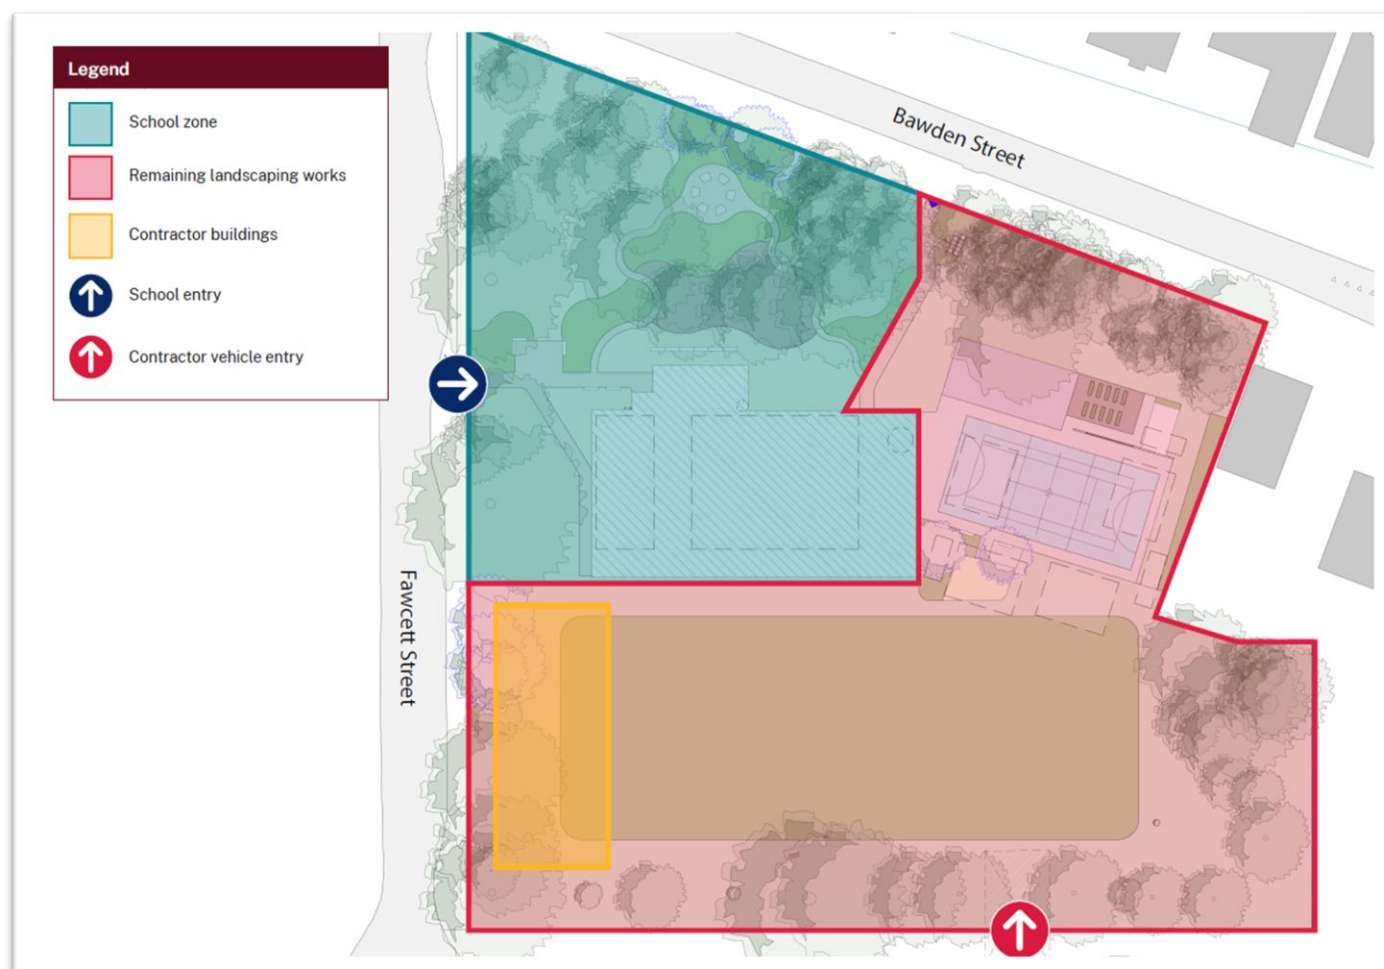

Work will continue through the summer school holidays to complete all landscaping in time for the start of the 2026 school term, weather permitting. The main entry of the school will return to
