

Tweed Heads Schools

Works notification

March 2021

Tweed Heads South Public School and Tweed River High School are being upgraded to provide new permanent teaching spaces and core facilities. The following works will be taking place at the schools in association with the upgrade projects.

Container delivery

On Thursday 4 March 2021 two 40-foot containers will be delivered to Tweed River High School. The containers will be located on the western boundary of the school and will be used for storage during the upgrade.

The delivery truck will access the site through Oxley Street as shown on the image overleaf and a small crane will be used for placement of the containers. Our contractor will ensure this process is conducted safely and a 'spotter' will accompany the truck to ensure the path of movement is clear.

Geotechnical investigations

From Monday 8 March 2021 we will be conducting some bore hole testing at both Tweed Heads South Public and Tweed River High schools as part of our site investigations for the school upgrades.

Six bore holes will be made across the Tweed River High School site and two at the Tweed Heads South Public School site as show in the image overleaf.

Our contractor will use a truck-mounted drill rig to make these bore holes, which is roughly as loud as a commercial lawnmower.

The bore holes will be approximately 10 cm wide and up to four metres deep. This work will involve four contractors being on site and will be completed in a day. Test areas will be cordoned off during drilling to ensure student and public safety.

Working hours

Standard work hours will apply - 7:00am to 5:30pm, Monday to Friday and 8:00am to 1:00pm on Saturdays.

Site visits

Over the coming months, there will also be site visits to both schools by our project team and contractors such as architects and engineers who will be conducting a range of site investigations as part of their planning and design work.
