Investing in our schools

As part of the NSW Government's plan to rebuild public education, the 2024-25 Budget is delivering record education funding, including \$1.4 billion for new and upgraded schools in regional NSW. This targeted investment will ensure growing communities get access to a world class public education.

Project Overview

As part of this investment Ulladulla High School will receive an upgrade. The upgrade at Ulladulla High School will replace 8 temporary teaching spaces with state-of-the-art permanent classrooms. The upgrade includes a new two-storey building and includes:

8 standard classrooms

3 support learning classrooms

Removal of existing temporary classrooms

New student amenities

Examples of classrooms being delivered in NSW

Progress Summary

The master plan and concept design have now been completed by the design team following consultation with the Project Reference Group (PRG). The PRG involves key stakeholders including local educational experts, architects, planners and design professionals in order to ensure designs are fit for purpose.

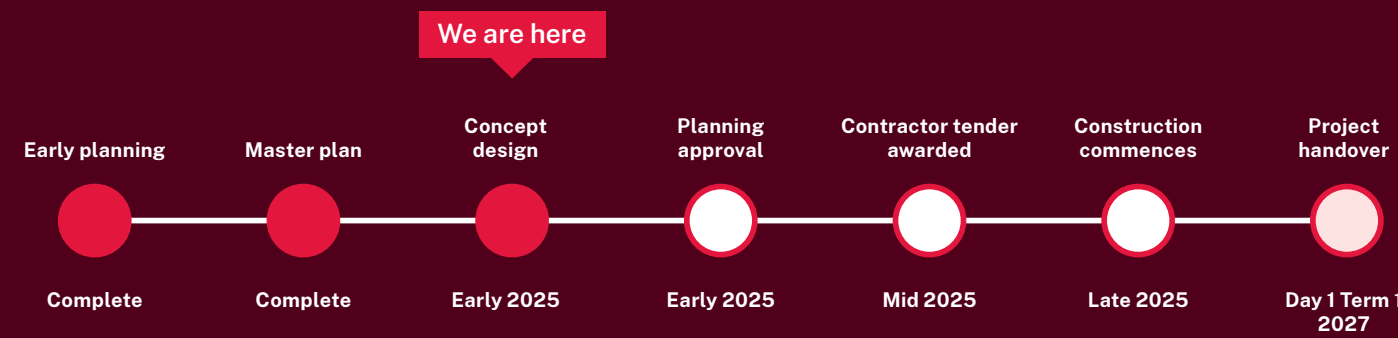

Next Steps

The design team has almost completed the next stage of the design. This stage includes defining building materials, room details, and the furniture, fixtures and equipment (FF&E) to be used. The project team is consulting with the school leadership to ensure that the classroom designs and layouts support teaching and learning needs.

Additionally, we are finalising the necessary documentation to seek planning approval and start the tender process for appointing a builder.

The timeline for construction will be finalised when the builder has been appointed, and the project has planning approval. Updated plans will be shared with the community in the coming months.

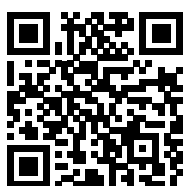

Delivering for Ulladulla High School – Project Timeline

The timeline above is subject to change. We will finalise a delivery program once the construction contractor has been appointed and the project has received planning approval.

Managing construction impacts

We will work with the contractor to manage impacts on the local community, and in close consultation with Ulladulla High School leadership to ensure that school operations continue with minimal disruption.
