

# Waitara Public School

## Works notification

July 2020

Dear neighbour,

We are upgrading Waitara Public School with new and improved education facilities for students. The upgrade is progressing well with Stage 1 works now complete.

As part of Stage 2 works, a heat exchange unit will be replaced on the roof of the new school building. This work requires specialist installation by helicopter between 8:30am and 10:30am on Saturday 18 July 2020, subject to weather conditions.

The work is subject to regulatory approval by the Civil Aviation Safety Authority (CASA).

Appropriate safety measures will be put in place to ensure the safety of the local community. The helicopter flight path and associated works will remain within the school boundary when lifting the heat exchange unit, this includes a 50 metre exclusion zone. Pedestrian management will be in place around the school perimeter.

Due to the nature of our work, you may experience increased noise, dust and wind from the helicopter. Please ensure any loose items on your premises are secured.

We will ensure that work is completed safely and efficiently, and disruptions are minimised.

Thank you for your patience during this important work.
